2018 Credit Union Advisory Council

October 2-4, 2018

Marriott Irvine Spectrum

Welcome and Introductions

Today's Agenda

Wednesday, October 3, 2018

Time	Topic	Presenter
7:30-8:30	Breakfast	
8:30-9:00	Welcome and Introductions	
9:00-10:00	Keynote: Robots, Blockchain & Fintech, Oh My!	Matt Davis
10:00-10:15	Break	
10:15-10:45	Credit Union Industry & Credit Trends	Sue Schroeder
10:45-12:15	Insights & Innovation Discussion Group	Credit Union Advisory Council Peer Discussion
12:15-1:00	Lunch	

Today's Agenda

Wednesday, October 3, 2018

Time	Topic	Presenter
1:00-2:00	Diving for Data: How Alternative Credit Data Can Help You Lend Deeper for Growth	Paul DeSaulniers
2:00-2:45	Best Practices for Membership & Loan Growth: Peer Presentation	Sandi Papenfuhs
2:45-3:00	Break	
3:00-3:45	Futureproofing Your Fraud Strategy	Skipper Mervin
3:45-4:00	Break	
4:00-5:15	New Product Innovation Showcase	
5:15-5:30	Day 1 Wrap-Up: Connecting the Dots	
6:30	Networking Event & Dinner	

Keynote: Robots, Blockchain & Fintech, Oh My!

Matt Davis

Founder, gameFI, CUWatercooler.com & CoopWatercooler.com

ROBOTS, BLOCKCHAIN & FINTECH (OH MY!)

MATT DAVIS

A close-up, high-resolution photograph of a man's face. He has long, wavy, light-colored hair and a full, dark beard and mustache. His eyes are blue and looking slightly to the right. The lighting is dramatic, highlighting the texture of his skin and hair. A black horizontal bar is overlaid across the middle of the image, containing the text "NEW NORMAL?".

Credit Unions and Fintechs: The Case for Collaboration

This report showcases the benefits of collaboration through the experiences of six organizations. Their collaborative efforts are the rallying cries for credit unions to consider a different way of engaging and working with fintechs.

[READ THE REPORT](#)

Key Takeaways

1. Shared Beliefs
2. Play to Strengths
3. Long Term vs Short Term
4. Talk Often and Ask Plenty of Questions
5. Embrace Divergent Perspectives

HOW CONSUMERS BEHAVE

f (What Consumers Want, What Consumers Need, What Consumers Can Afford)

“We always overestimate the change that will occur in the next two years and underestimate the change that will occur in the next ten

Don't let yourself be lulled into inaction”

The image features a large number of identical blue, blocky robots. Each robot has a square head with two yellow circular eyes and a red antenna on top. The body is composed of several rectangular blocks, with a central panel on the chest that has a small screen and some buttons. The robots are arranged in a dense, slightly overlapping pattern, creating a sense of a large army or a vast population. The background is a dark, solid blue color.

A Robot
Is After
Your Job

DETROIT — Technological innovation is widely billed as a miracle cure for the United States' economic doldrums. Its aftereffects, however, may be far from benign. The introduction of revolutionary new technologies such as robots — versatile computer-controlled mechanical arms — raise two painful possibilities: sizeable losses of jobs and a deteriorated quality of working life.

Direct Access to the Credit Universe

Analytics Applied to Your Challenges

Fast, easy access to the highest quality data for analytics and research

- **Gain new market insights** – Evaluate market trends for product and strategic planning
- **Assess and prospect more effectively** – Build, test and calibrate your prospecting strategies
- **Manage risk** – Optimize model performance with multiple years of archive files and analytic tools
- **Develop superior account management strategies** – Streamline account management by identifying risks AND opportunities
- **Quickly handle ad-hoc analytic requests**

What Is the Experian Analytical Sandbox?

What is it?

Big data analytical solution with immediate access to archived credit data in a securely hosted, user-friendly environment:

- Monthly snapshots
- Familiar analytics tools (SAS, R Studio)
- FCRA non-regulated data
- Scalable Hadoop cluster processing
- Additional Capabilities on the near-term roadmap (Python, Hue, Impala, and Spark)

What makes it different?

- True historical 100% national sample
 - Includes opt-outs
 - Includes trade line data
 - Includes access to Experian scores and attributes
- 15 years of monthly history
- Client customer and trade keys for sample
- Anonymization service for linking data
- Low entry price and scalable for growth

Activity: 1 Hour

Instructions:

- Divide into 2 groups
- Discussion - 35 minutes
- Vote - 10 Minutes
- Readout - 15 minutes

Tips:

- Go for **quantity**, don't critique even the most CRAZY ideas
- Write **BIG** so others can see it
- One thought per post it note
- Use dots to **vote** at the end

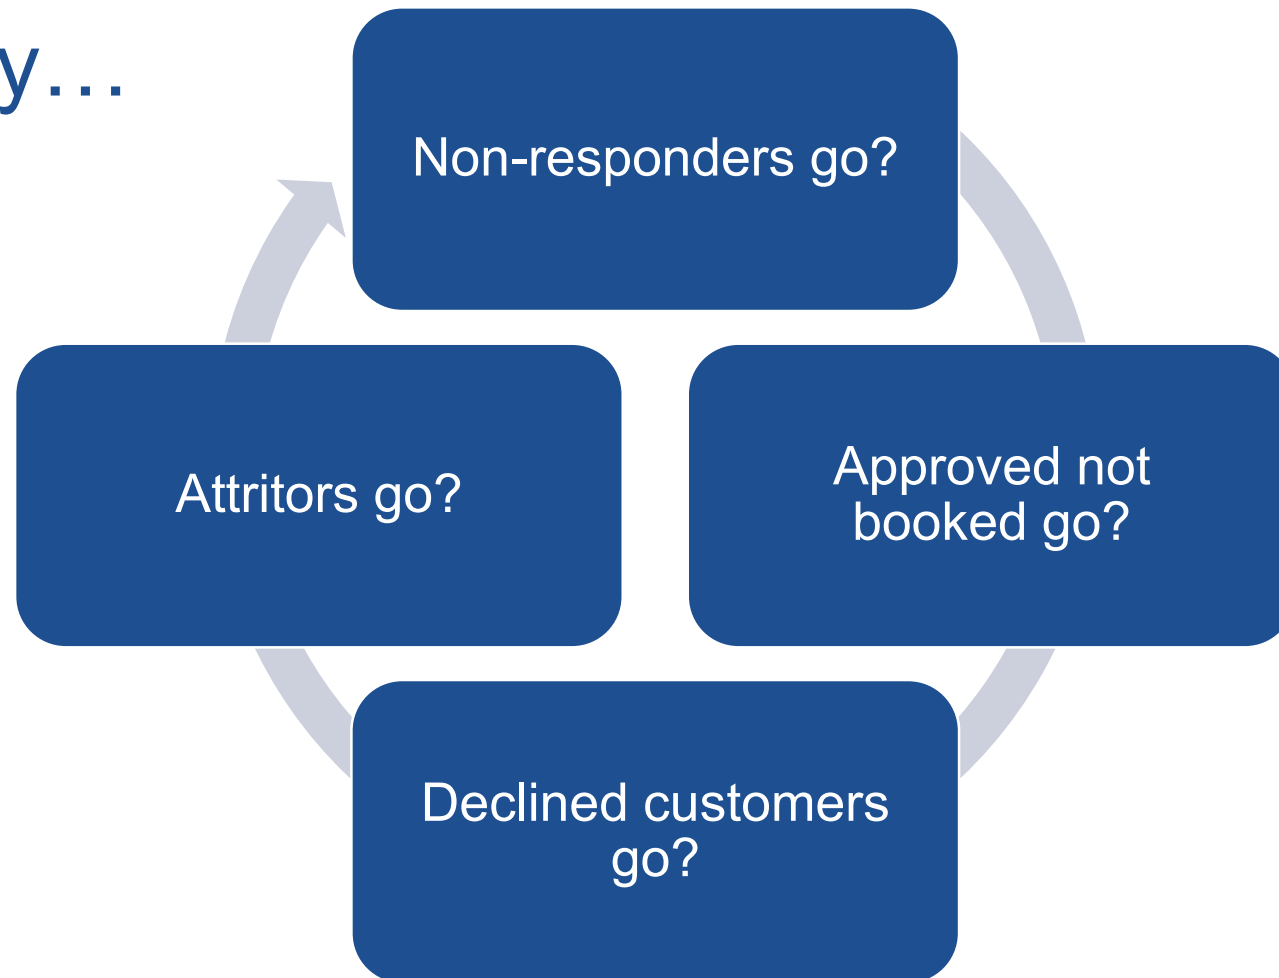

Appendix

Bureau-Based Inferencing

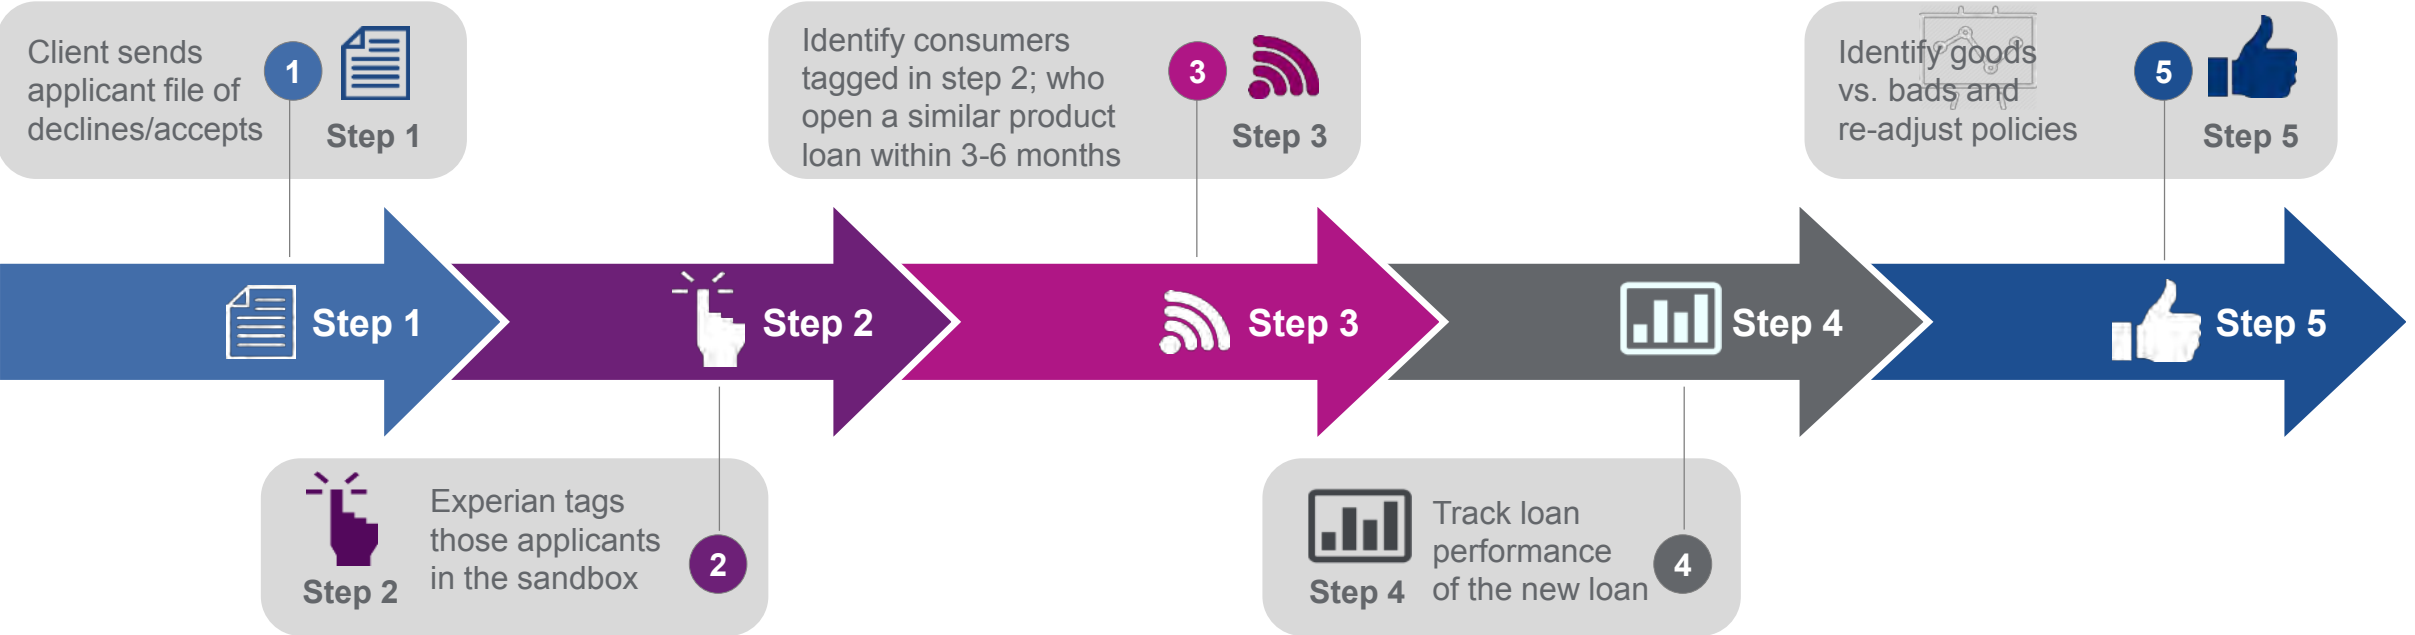

Data Availability – Cross Lifecycle Use Cases

Where did my...

Process

“If this applicant had been accepted, how would they have performed?” Bureau inference

Application Reject Inferencing

Scenario

Client wants to understand what's happening in their applications process to see if there are opportunities to change their underwriting criteria to capture additional originations for lower-scored consumers

They also want to understand what's happening with customers they are approving that are choosing not to originate with them

Client would normally provide reject file with consumers flagged as rejects or opt-outs

***Data in this example is synthesized with very simple criteria (hard 600 Vantage cutoff) based off auto inquiries from Q1 2016 with a performance observation date of June 2017**

**** While data in this example is for Auto, the same exercise is valid for any product.**

Rejects

- Head of product for Scoring, Alternative Data & Collections at Experian.
- Quoted in industry-leading publications such as PYMNTS and Time.
- Frequent presenter at industry events such as CUNA, Experian's Credit Union Advisory Council, LendIt and Money 20/20.

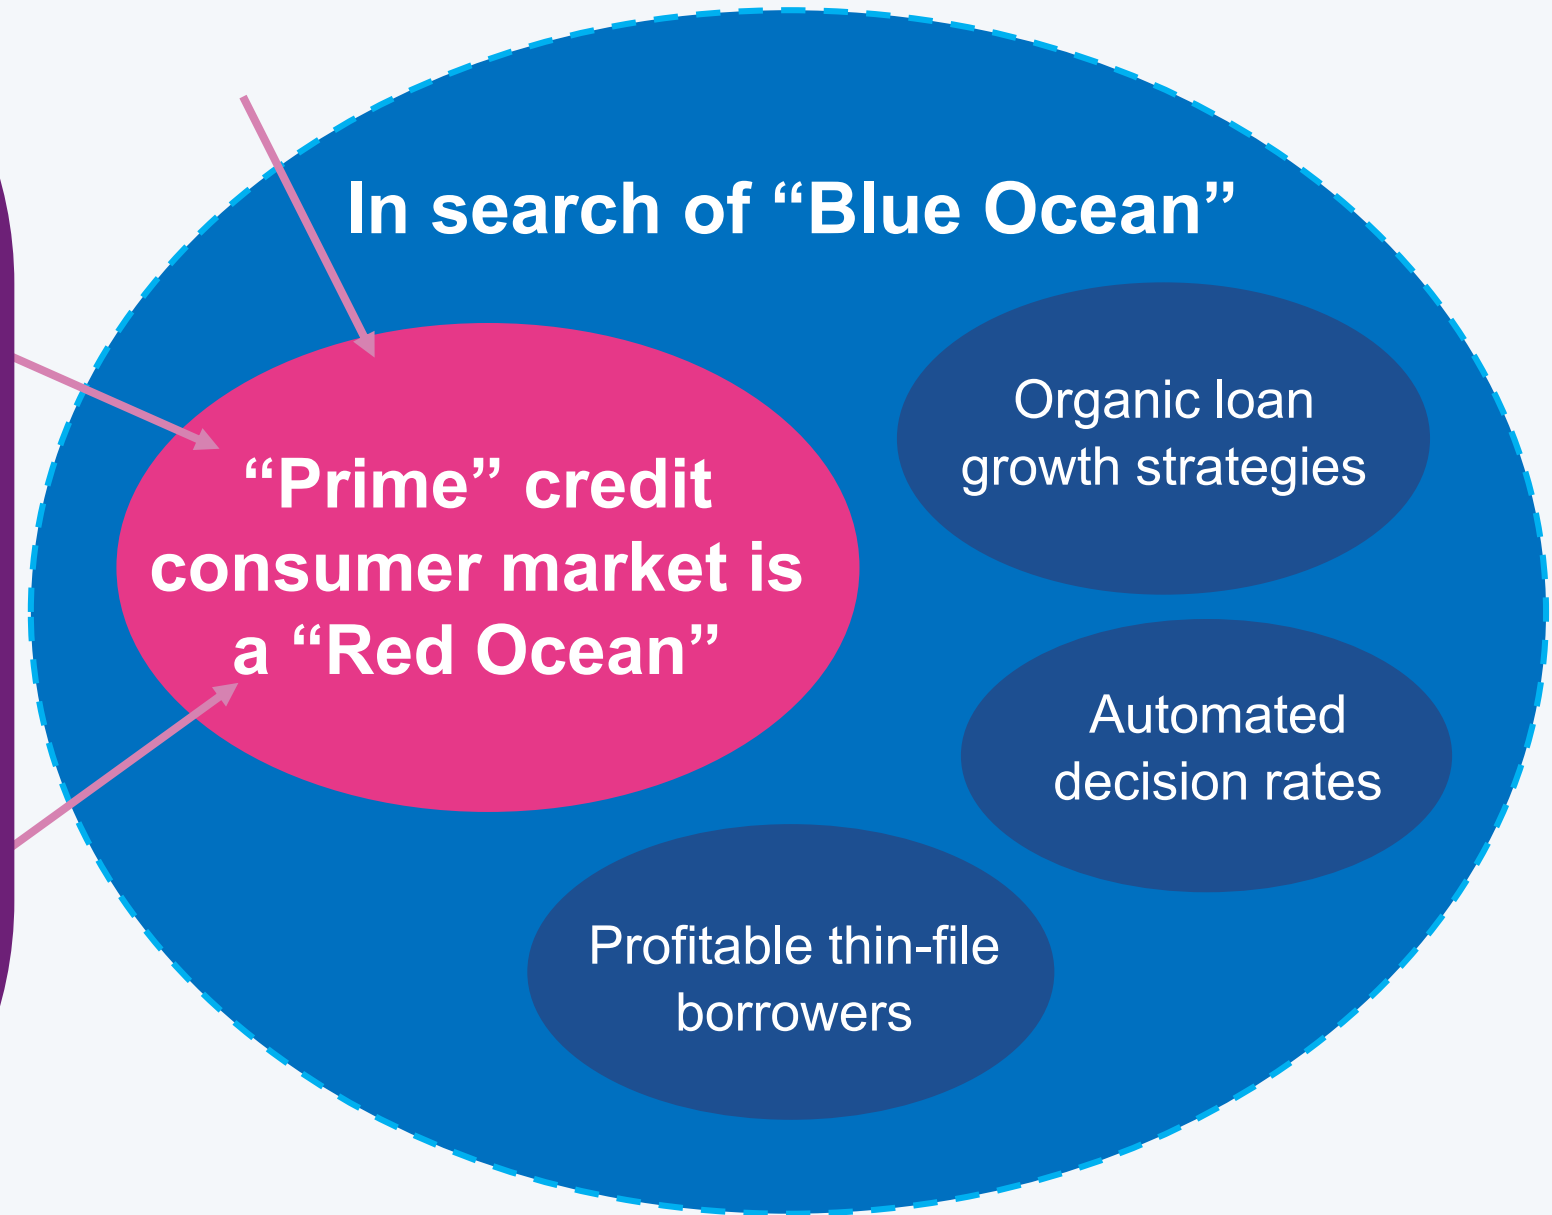

Opportunity for Credit Unions

Our Perspective

**Alternative
Credit Data
opens up more
opportunity**

Why Alternative Credit Data

Serving our
community/
members is in
credit union
DNA

**One third of
FI's** plan to
use alt credit
data in the
future

Majority lenders
believe alt credit
data **will help
customers**
who've been
denied

**Risk
and yield
improvement**

**Triple
bottom-line**

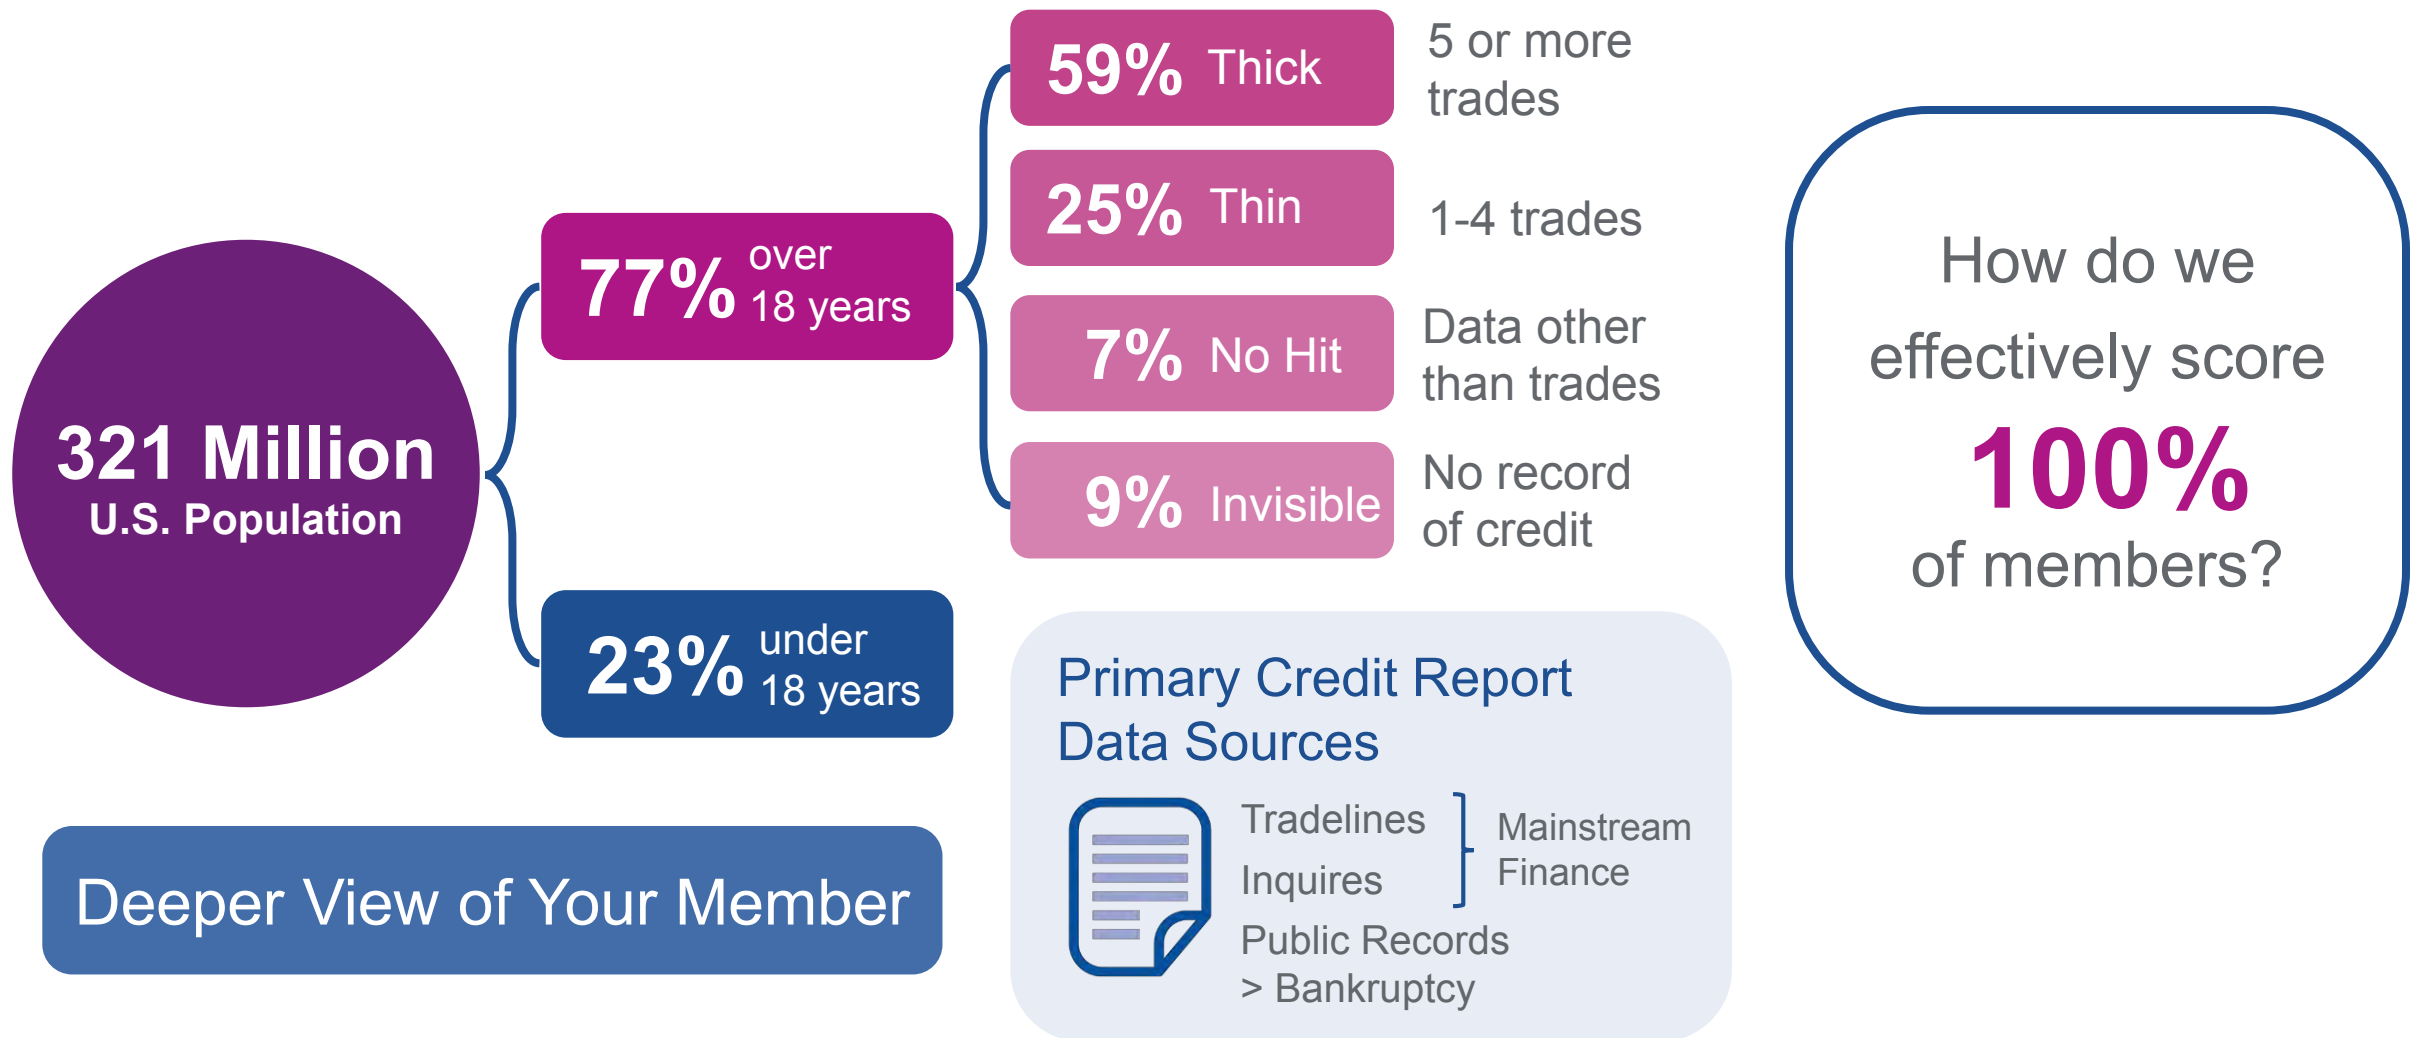

*A CFPB released study reported that 26 million Americans are **“credit invisible”**
defined as consumers without traditional credit bureau credit records*

12 million are millennials

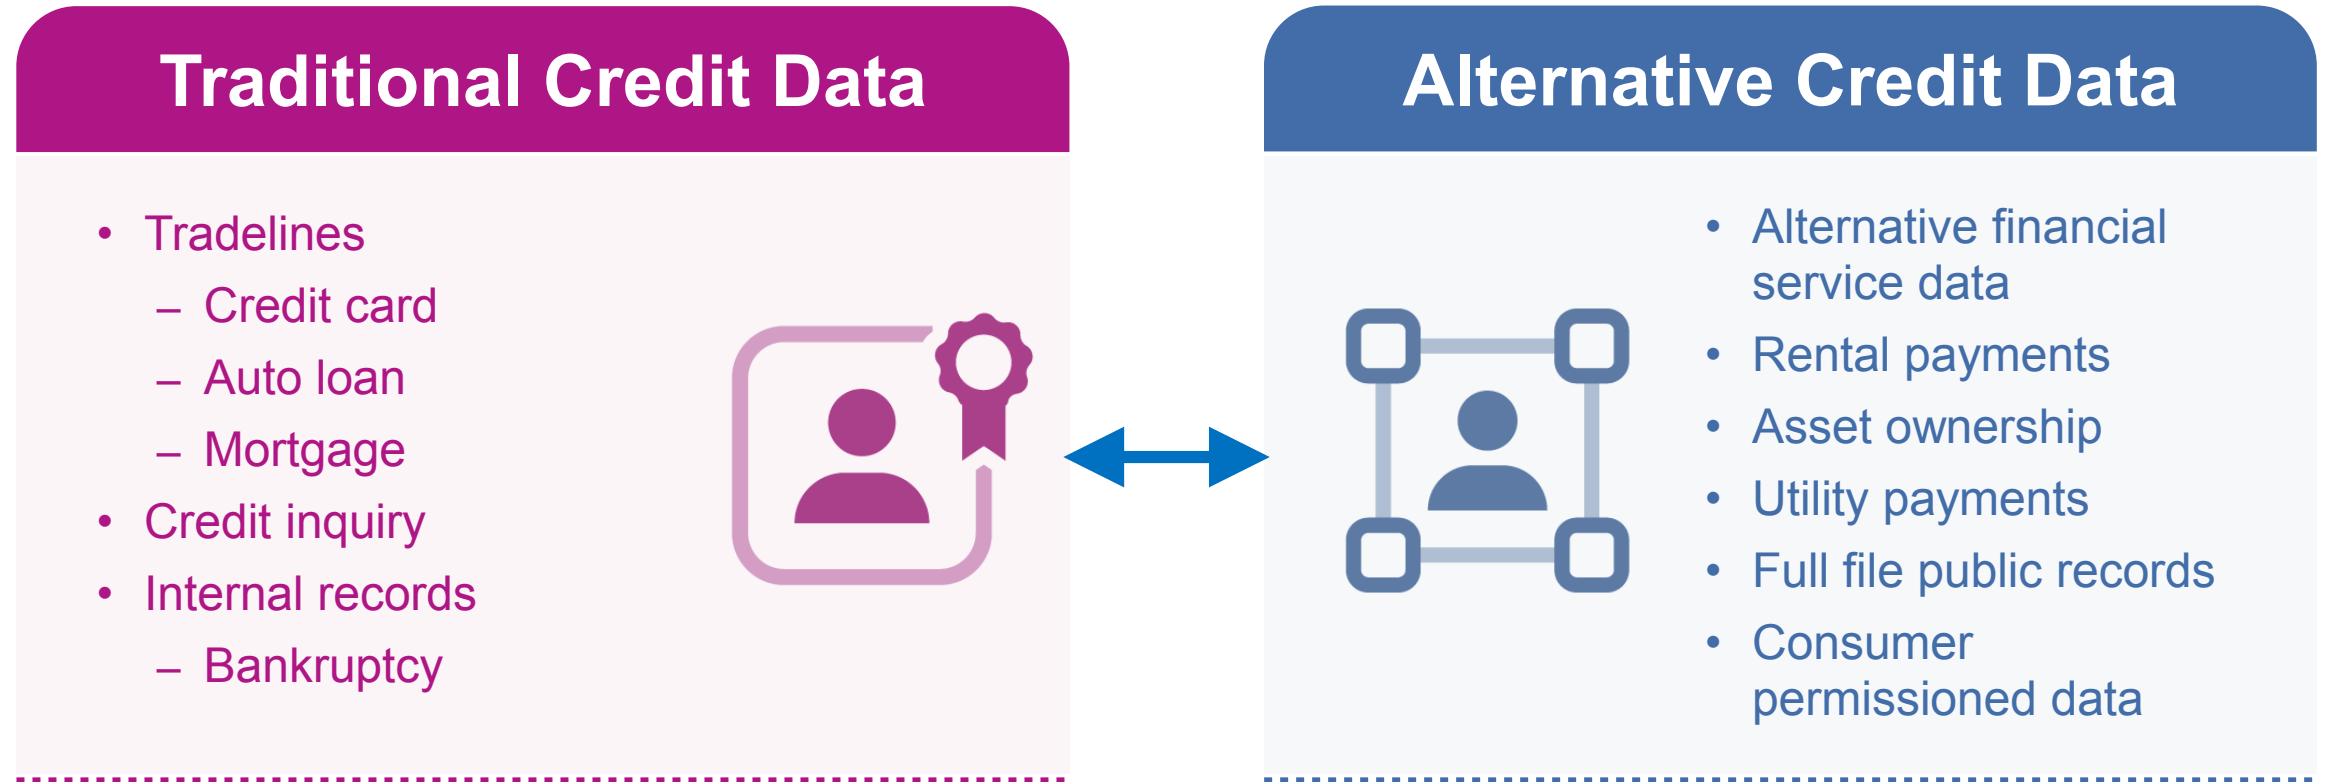

Alternative Credit Data Overview

The Riddle of Alternative Credit Data

What is Alternative Credit Data?

ALL INFORMATION THAT IS FCRA-COMPLIANT

Displayable. Disputable. Correctable.

What Opportunities Are We Striving to Address with Alternative Credit Data?

Traditional Lenders:

- Strengthen and expand portfolios
- Increase and sustain competitive advantage
- Improve customer experience

Consumers

- Increased access to affordable financing
- Speed / ease / convenience
- Build credit

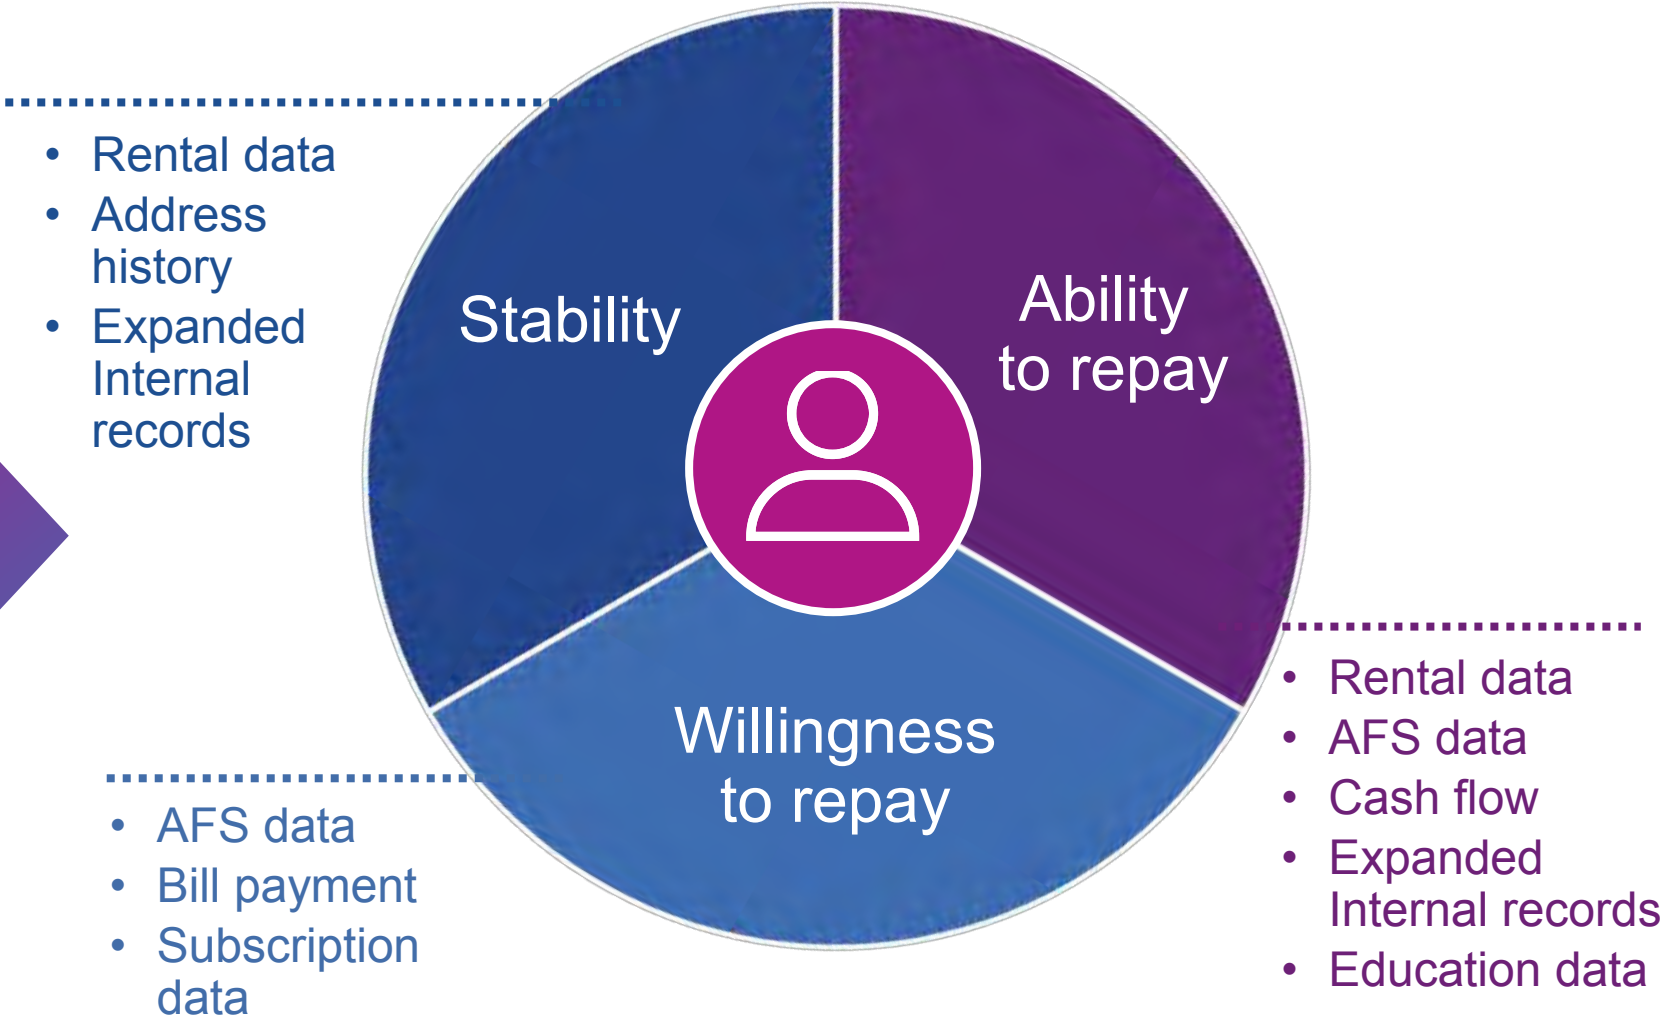

Adjacent Players:

- Enter markets via new business models (e.g. Fintech)
- Grow in underserved segments (e.g. Alternative Finance)
- Differentiate data assets and engage consumers (e.g. Information Services)

How Alternative Data Sources Relates to Consumer Credit Worthiness

The traditional credit profile data was developed to assess a consumers credit worthiness

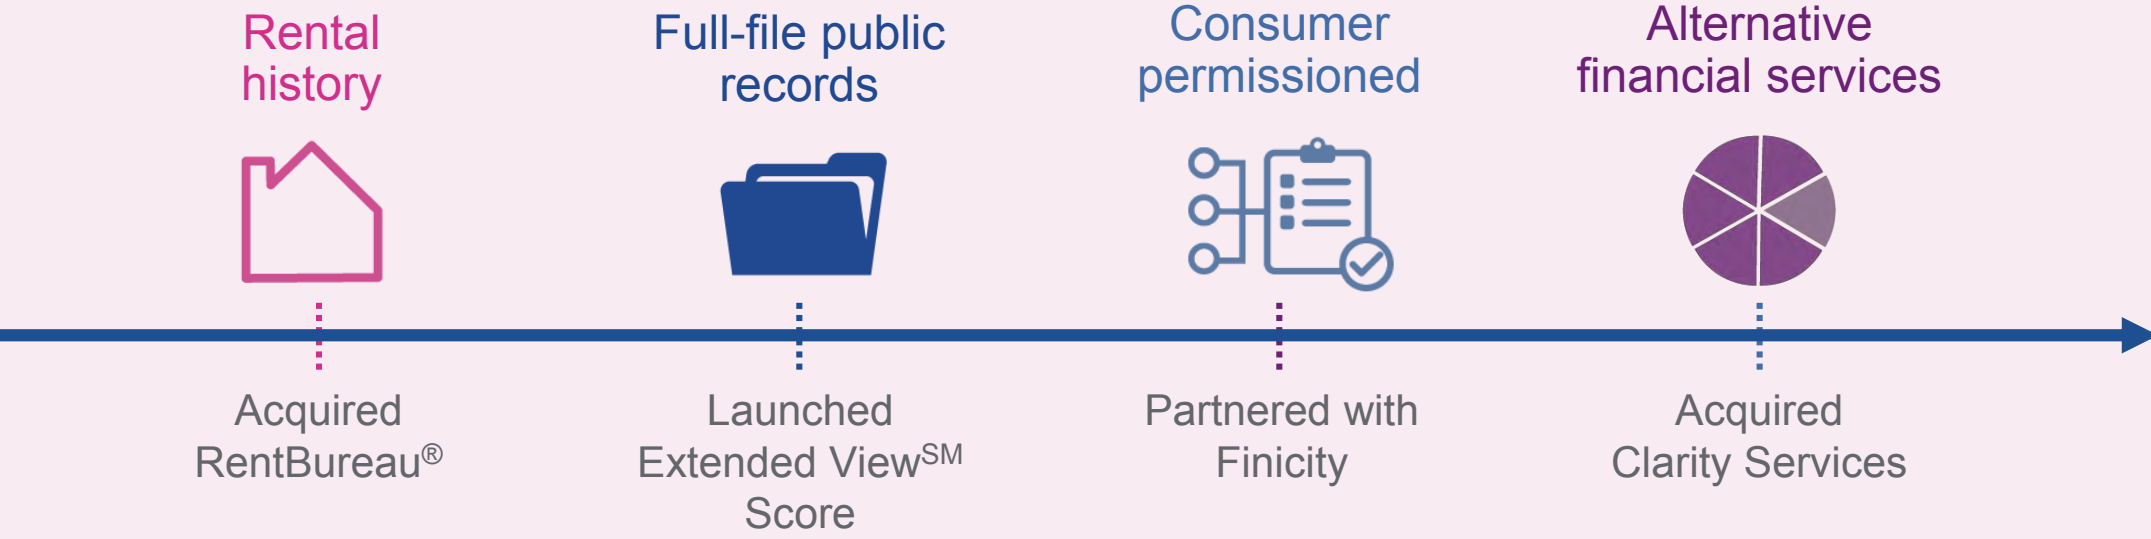

Experian's Alternative Credit Data

- Increases ability to predict consumers' capacity and willingness to repay
- Not historically or consistently reported to national credit bureaus
- Can be effectively and compliantly operationalized and scaled

Key Experian milestones

Alternative Data Is Unique and Additive

National Credit Bureau

- 1 open auto loan
- 2 credit cards

Thin credit file gives little insight into credit risk

Clarity Specialty Bureau

- 2 open trades
- 5 closed trades paid in full
- 3 inquiries in 90 days
- 2 bank accounts last 12 months
- 1 move in last 2 years

Adding Clarity data provides significant positive information on performance on alternative finance trades not available on traditional credit file

Extended View Score

- 750 EVS score
- Attended 4 year college
- Profession: registered nurse

Extended View Score indicates low risk with supplemental information on education and profession

RentBureau

- 1 open and current rent trade
- No derogatory rental history

RentBureau shows one open and current rental trade with no derogatory information

Finicity

- Verified income: \$ 5,127
- Verified assets: \$16,944

Finicity confirms income and assets with consumer permission

Dialing into Clarity Services

Largest nationwide, FCRA-regulated credit bureau
that specializes in gathering and providing information about non-prime consumers

Powerful real-time fraud detection
and credit risk management solutions

Rich data on 62 million unique consumers
representing the majority of the U.S. non-prime consumer population
(two times larger than next alternative credit data bureau)

Proprietary, real-time technology, flexible architecture
and continuous innovation to be the leading provider to the most sophisticated, analytical
and technology driven online lenders

Common Challenges

New fraud threats
across all channels

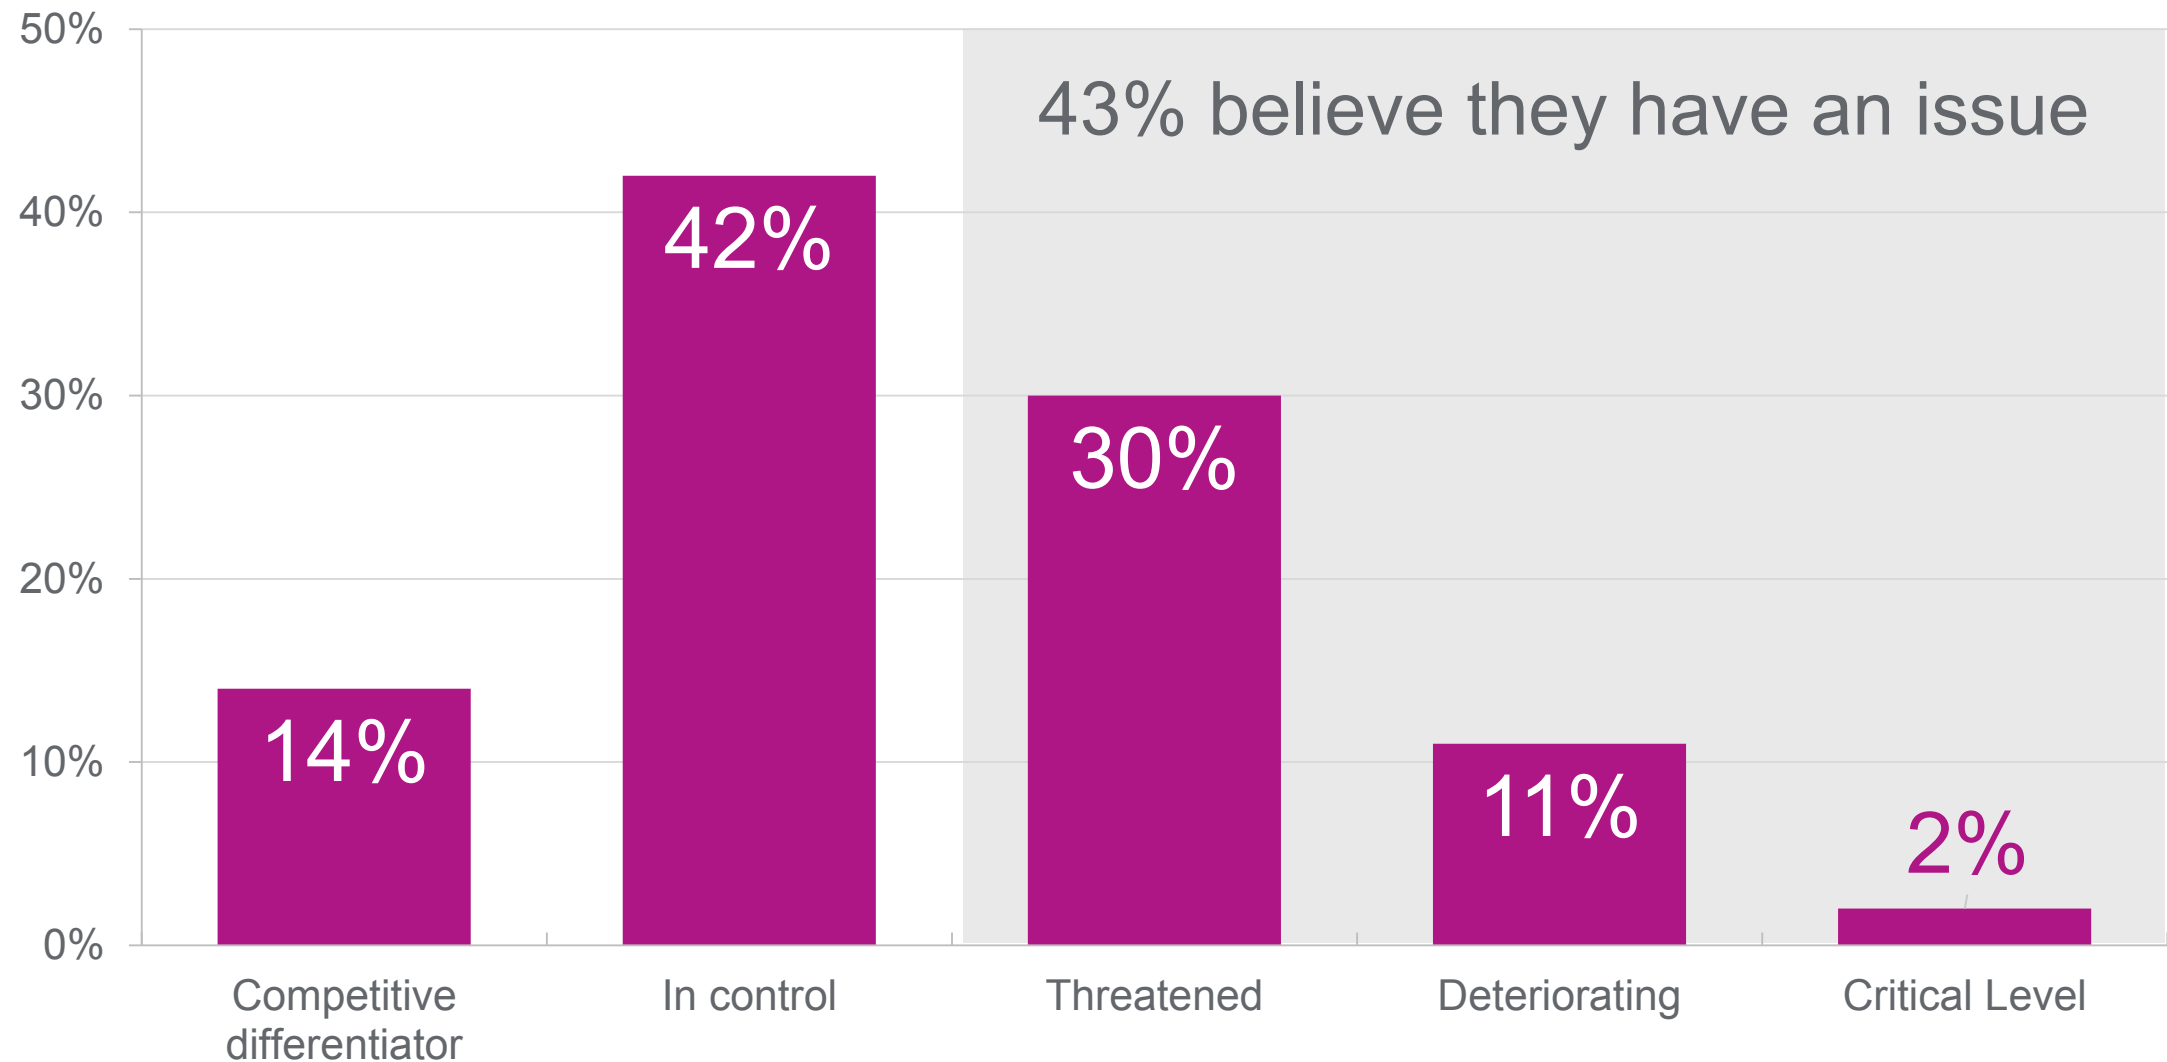

Business and
regulatory change

Where Does Your Credit Union Fit?

For some institutions, fraud fighting is a competitive differentiator; for others, fraud is a serious problem

Synthetic Identity Fraud

Losses associated with synthetic identity fraud estimated to be in the billions

True scope hard to quantify because many clients associate the synthetic identity losses as a credit risk

- Estimates that synthetic identity fraud account for:
 - 20% of credit card charge offs
 - 80% of credit card fraud losses
- Synthetic Identity losses manifest in several ways including:
 - Bust out
 - Never pay
 - First payment default

Synthetic Identify Fraud

Synthetic Fraud Problem

Scope of the Problem - from Bad to Worse

The number of “score eligible” accounts opened has risen steadily

Score Eligible Account Openings / 2013-2016

- Score eligible population increased over 2.5X between 2013 and 2016
- Bad rate on score eligible population increased by ~2.5X in the same time window

Bust Out Fraud

By taking action on high risk accounts, losses can be reduced significantly:

- Outstanding balance is 40% lower 3 months prior to bust out
- 20% lower 2 months prior to bust out
- BustOut Score is calibrated to predict 3 months prior to bust out
- Earlier prediction = lower losses across accounts

4

Link Analysis

Identifies fraud through hidden associations

Automated linking to many degrees of separation

Effective identity management requires standardized and measurable **identity proofing** at onboarding in combination with ongoing **authentication** of existing user activities and an underlying program of **identity management (monitoring)** of all identities within a portfolio or user population to **identify and act** upon substantive changes in the verification, confidence, or inherent risk associated with a specific identity.

Identity Proofing

The goal of identity proofing is to verify individuals are who they claim to be at a specific point in time. Identity proofing is applied in the acquisition and origination stages of the Customer Life Cycle and typically performed during or prior to activities such as account opening, profile registration and biometric enrollment.

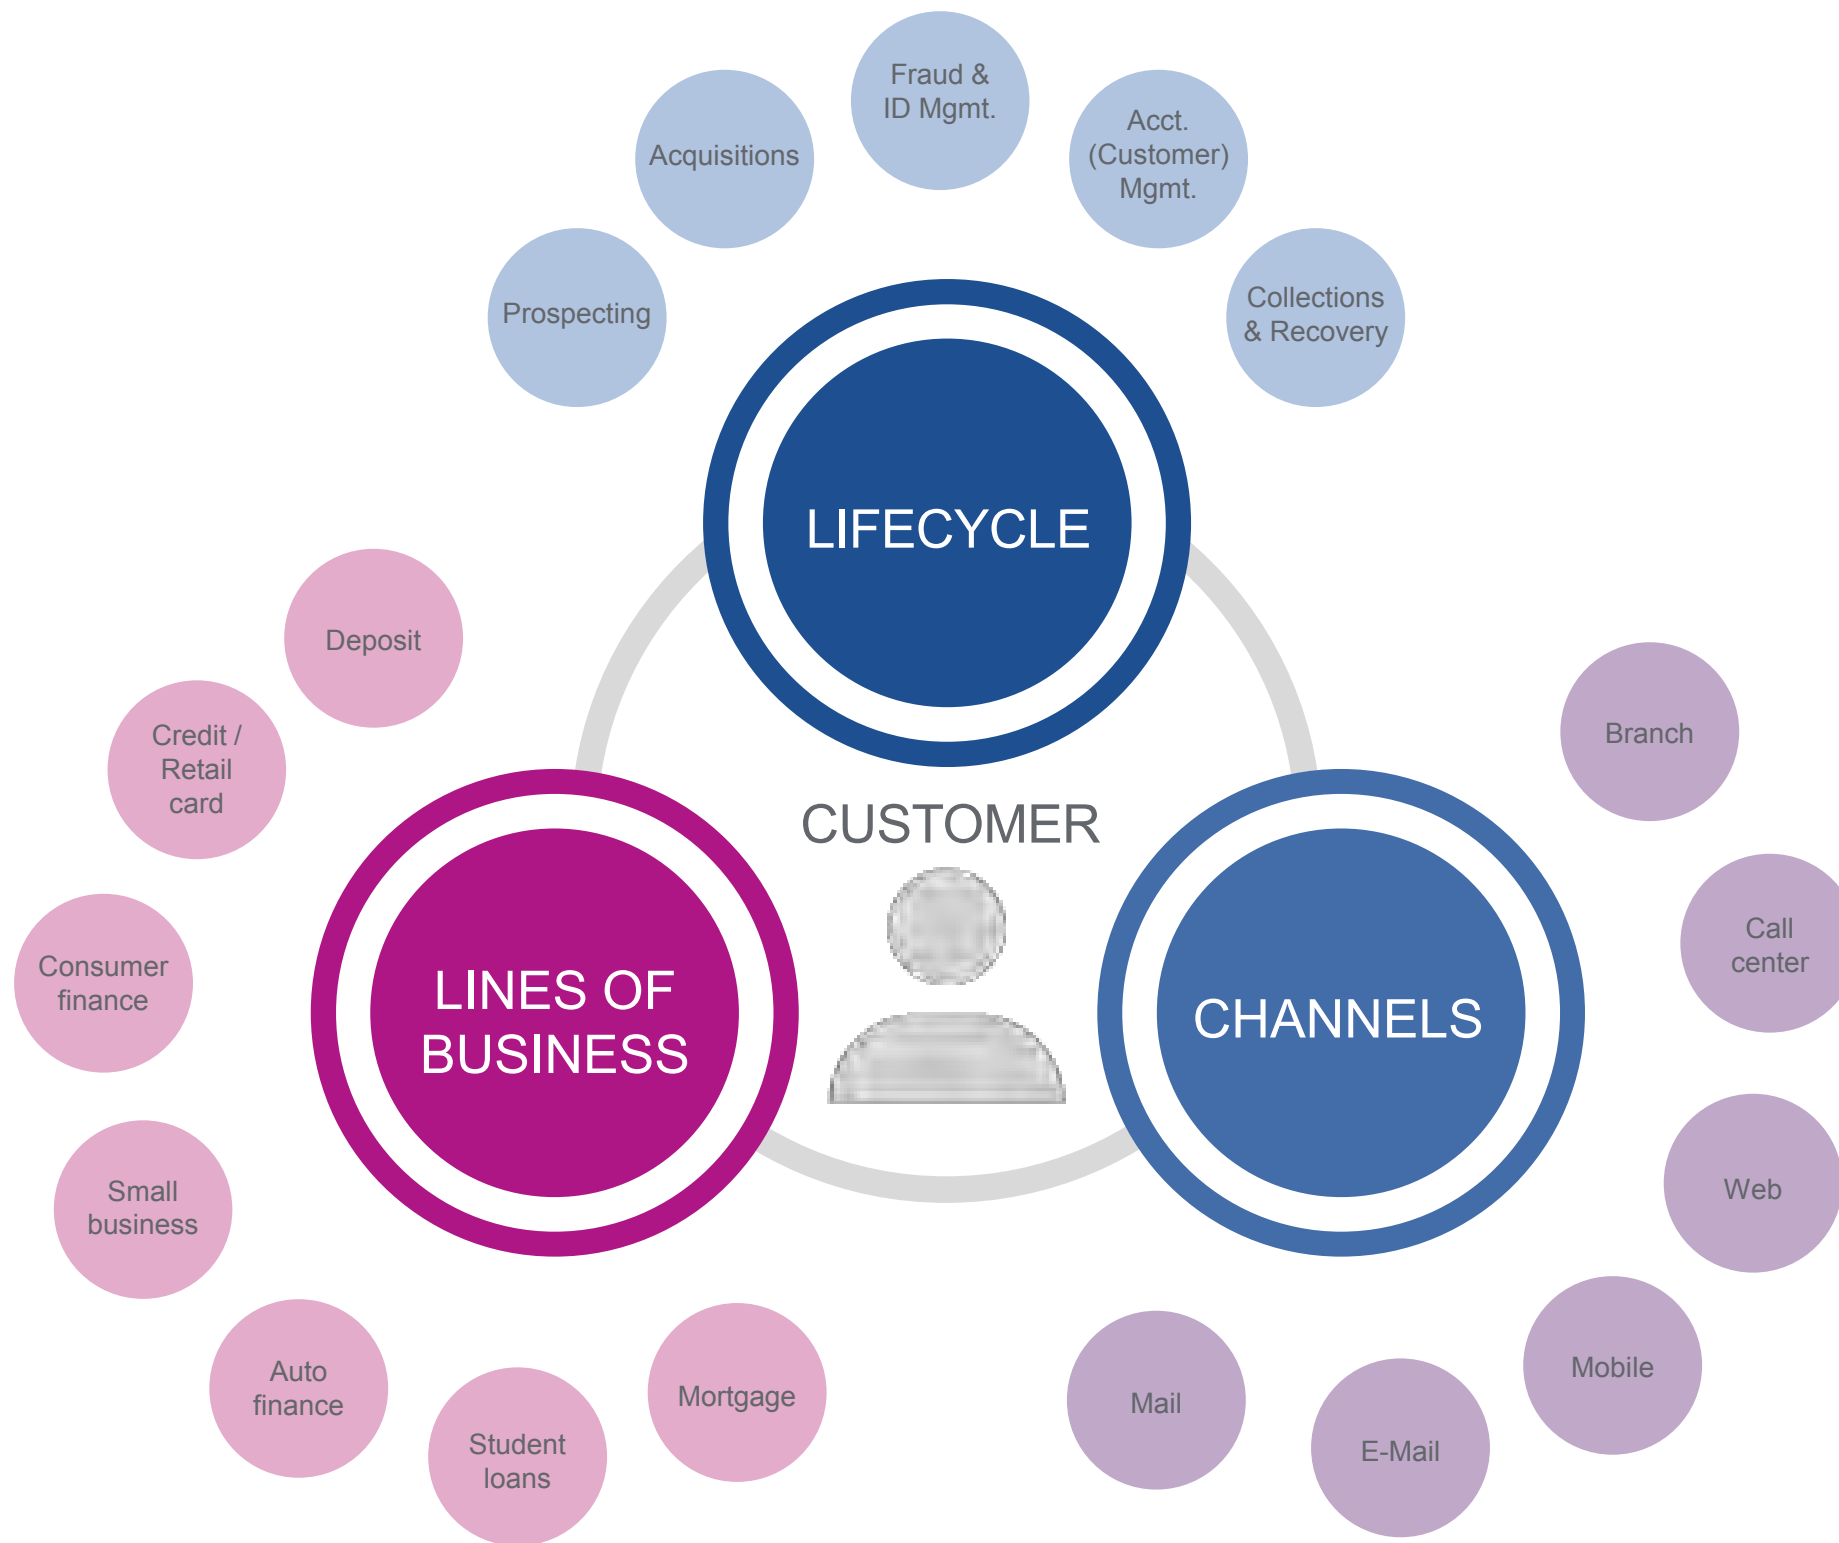

Authentication

Authentication is the ongoing verification of an individual's identity. In the Customer Life Cycle, authentication is most often applied during account login, account access and management and digital transactions.

Identity Management

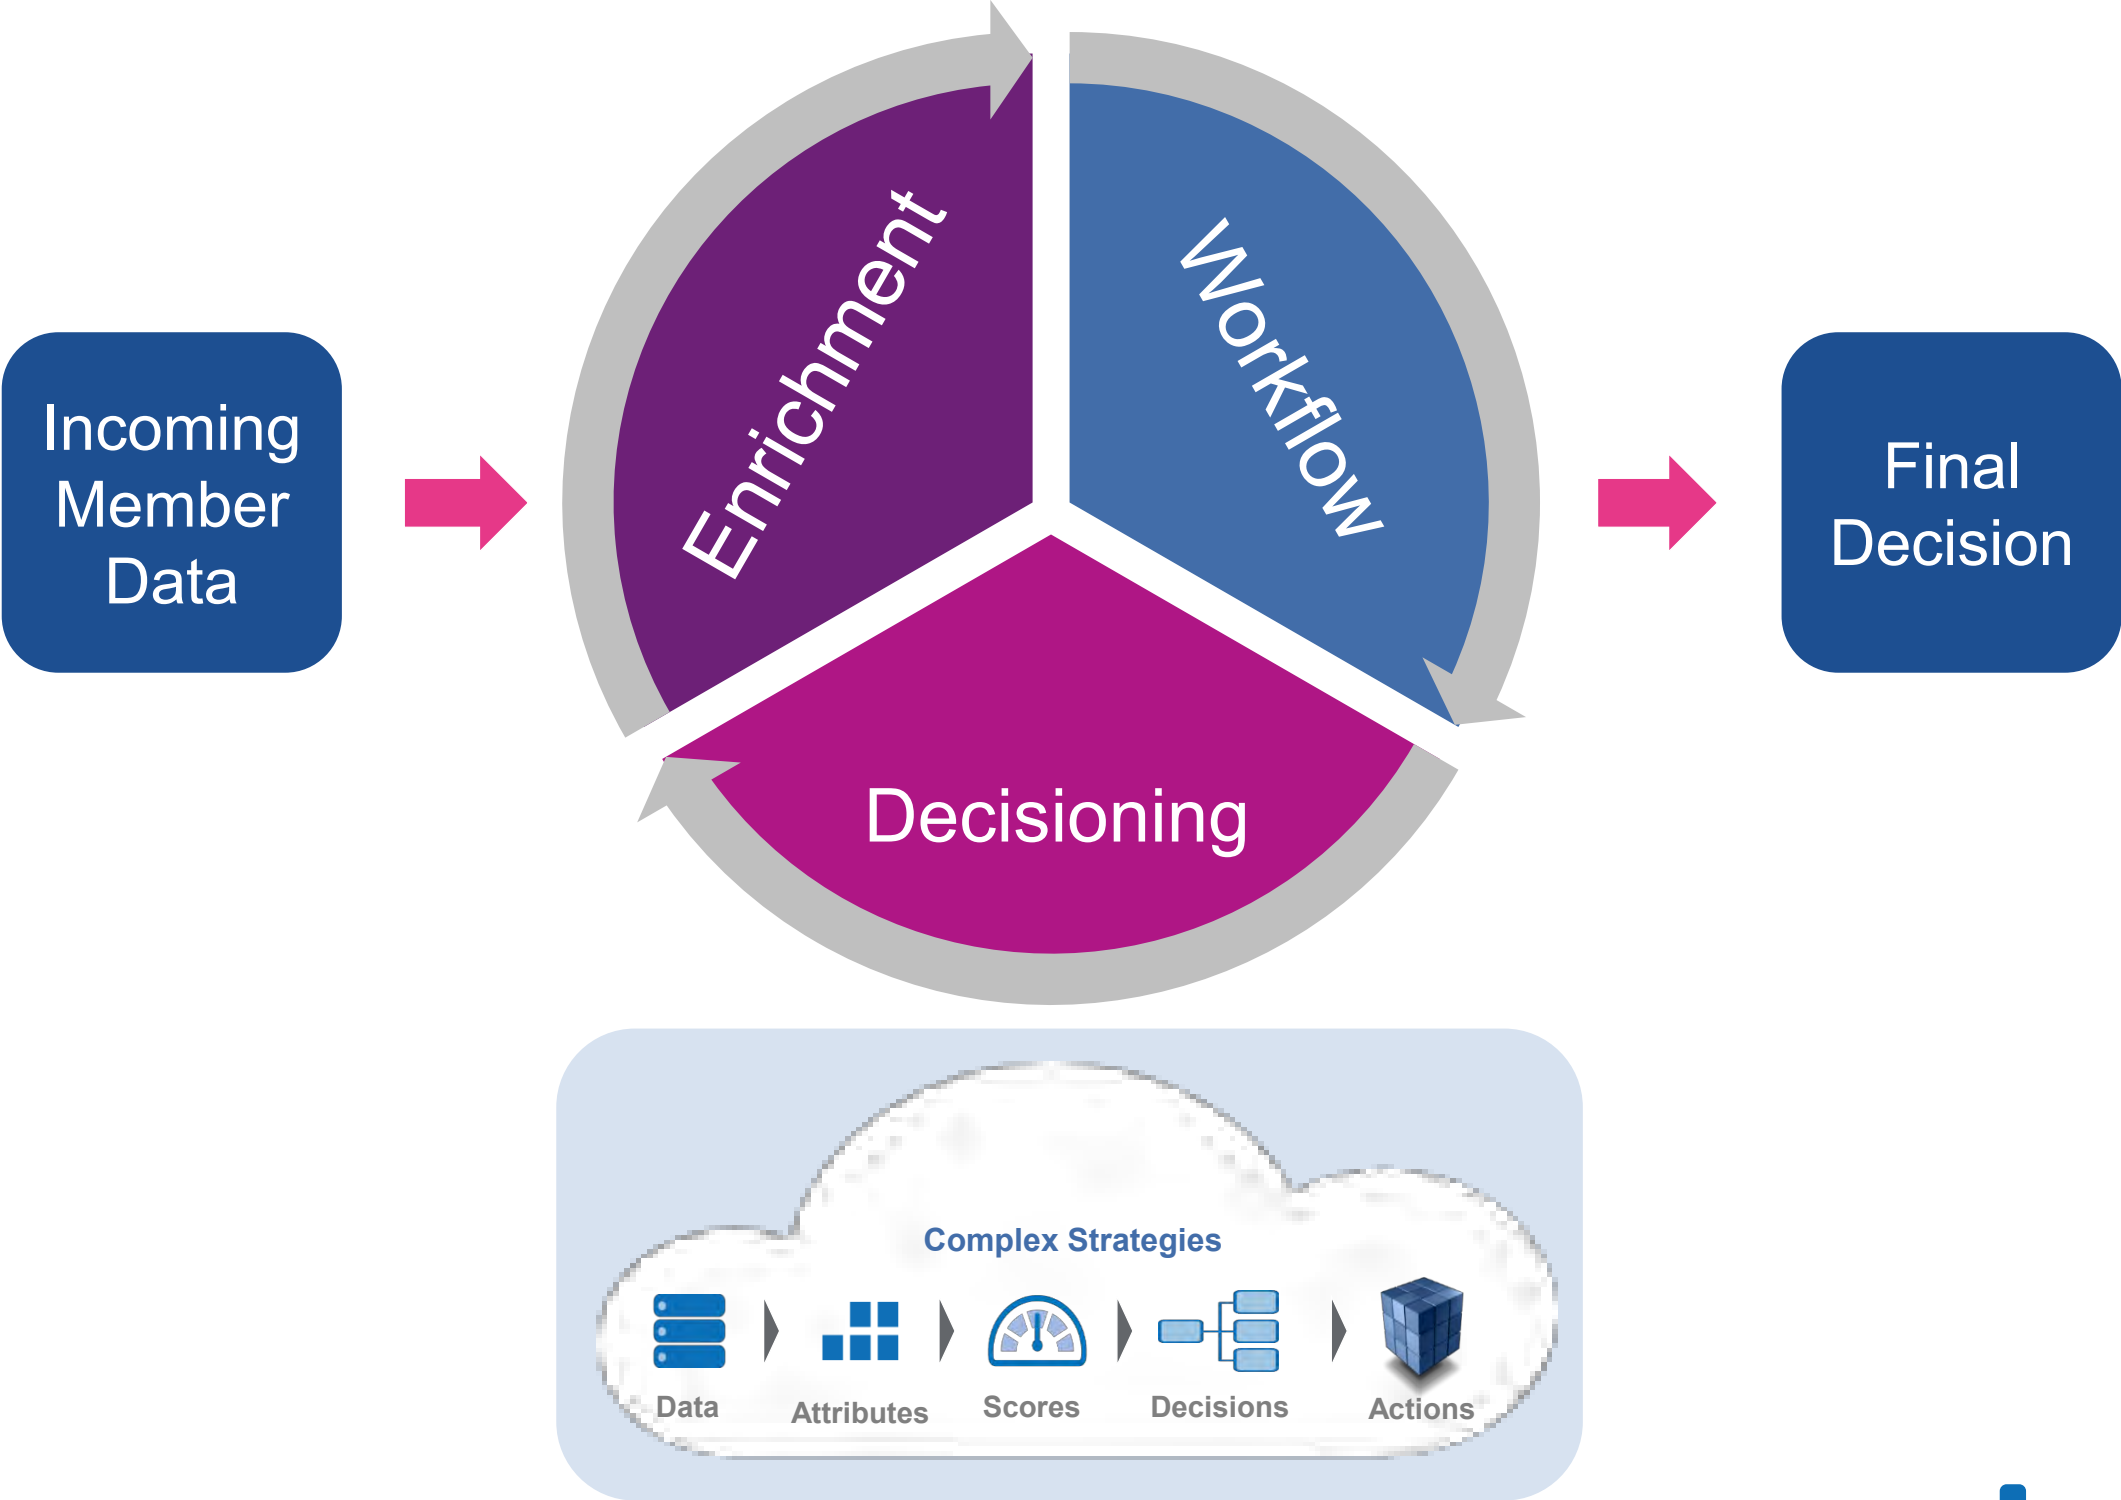

Identity management is the behind-the-scenes monitoring of an individual's identity, performed throughout the Customer Life Cycle and supported by proactive issuance of risk alerts and warnings.

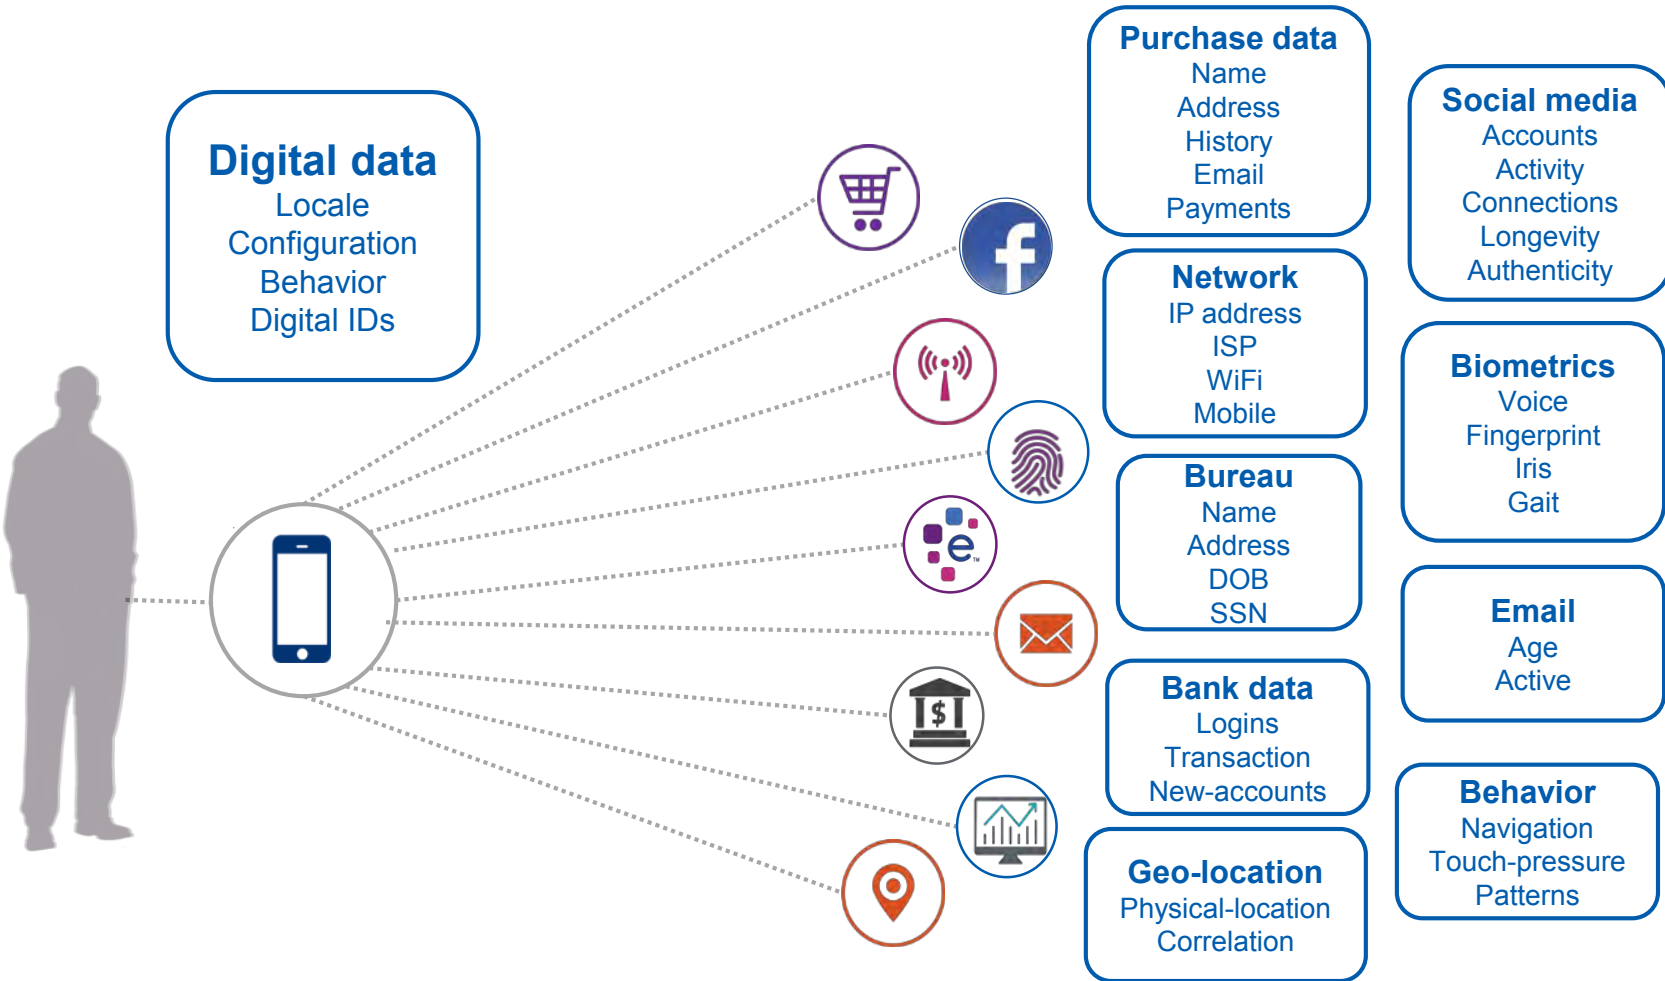

Customer Lifecycle

Orchestration

Create the Ultimate Consumer ID Profile . . .

Traditional ID solutions use basic Bureau-based personal identification information approach – “Essential, but not sufficient”

*The market is asking for richer **context-based data assets**, like digital*

*There are also new **emerging alternative data sources**, which we can leverage...*

. . .To Truly Recognize Your Member

Layered Identity Verification and Risk Segmentation

Additive recognition, detection, and false positive reduction using a combination of:

- Targeted scores
- Observations, attributes and indicators
- Device risk assessment
- Comprehensive risk typing and workflow
- Holistic, consistent, and measurable decisioning
- Ongoing tuning
- Proofs of concept
- Efficient integrations and use cases

Machine Learning

Millions of instructions per second

Key Points

- PII data has been and should be assumed compromised – decisions require breadth and depth

- Omni-channel view across identities and devices has been our primary road map driver

- Fraud risk management must be layered and contextually invoked

- Compliance requirements and fraud risk assessments can and should be aligned

- Origination targets across varied populations and products require specific strategies

Introducing CrossCore®

for identity
proofing and
authentication

CrossCore

A Better Way Forward

Manage the entire fraud and identity portfolio

Define the level of confidence required — at a transaction level

Optimize decisions across services

Take back control — move at the speed of fraud

Purpose-built for fraud and identity services

CrossCore

EFFICIENCY

- Maximize straight-through processing
- Increase fraud detection
- Reduce fraud losses
- Decrease operational costs

CONTROL RISK

- Reduce fraud losses with layered, risk-based authentication
- Consistently manage fraud risk across all channels
- Monitor performance and adjust strategies over time

COMPLIANCE

- Increase efficiency of regulatory reporting and compliance
- Comprehensive knowledge around customers
- Consistent policies and processes

CLIENT SATISFACTION

- Minimize friction on customer relationship
- Safeguard customer offline and online identities
- Improve client retention

Overcoming the Challenges

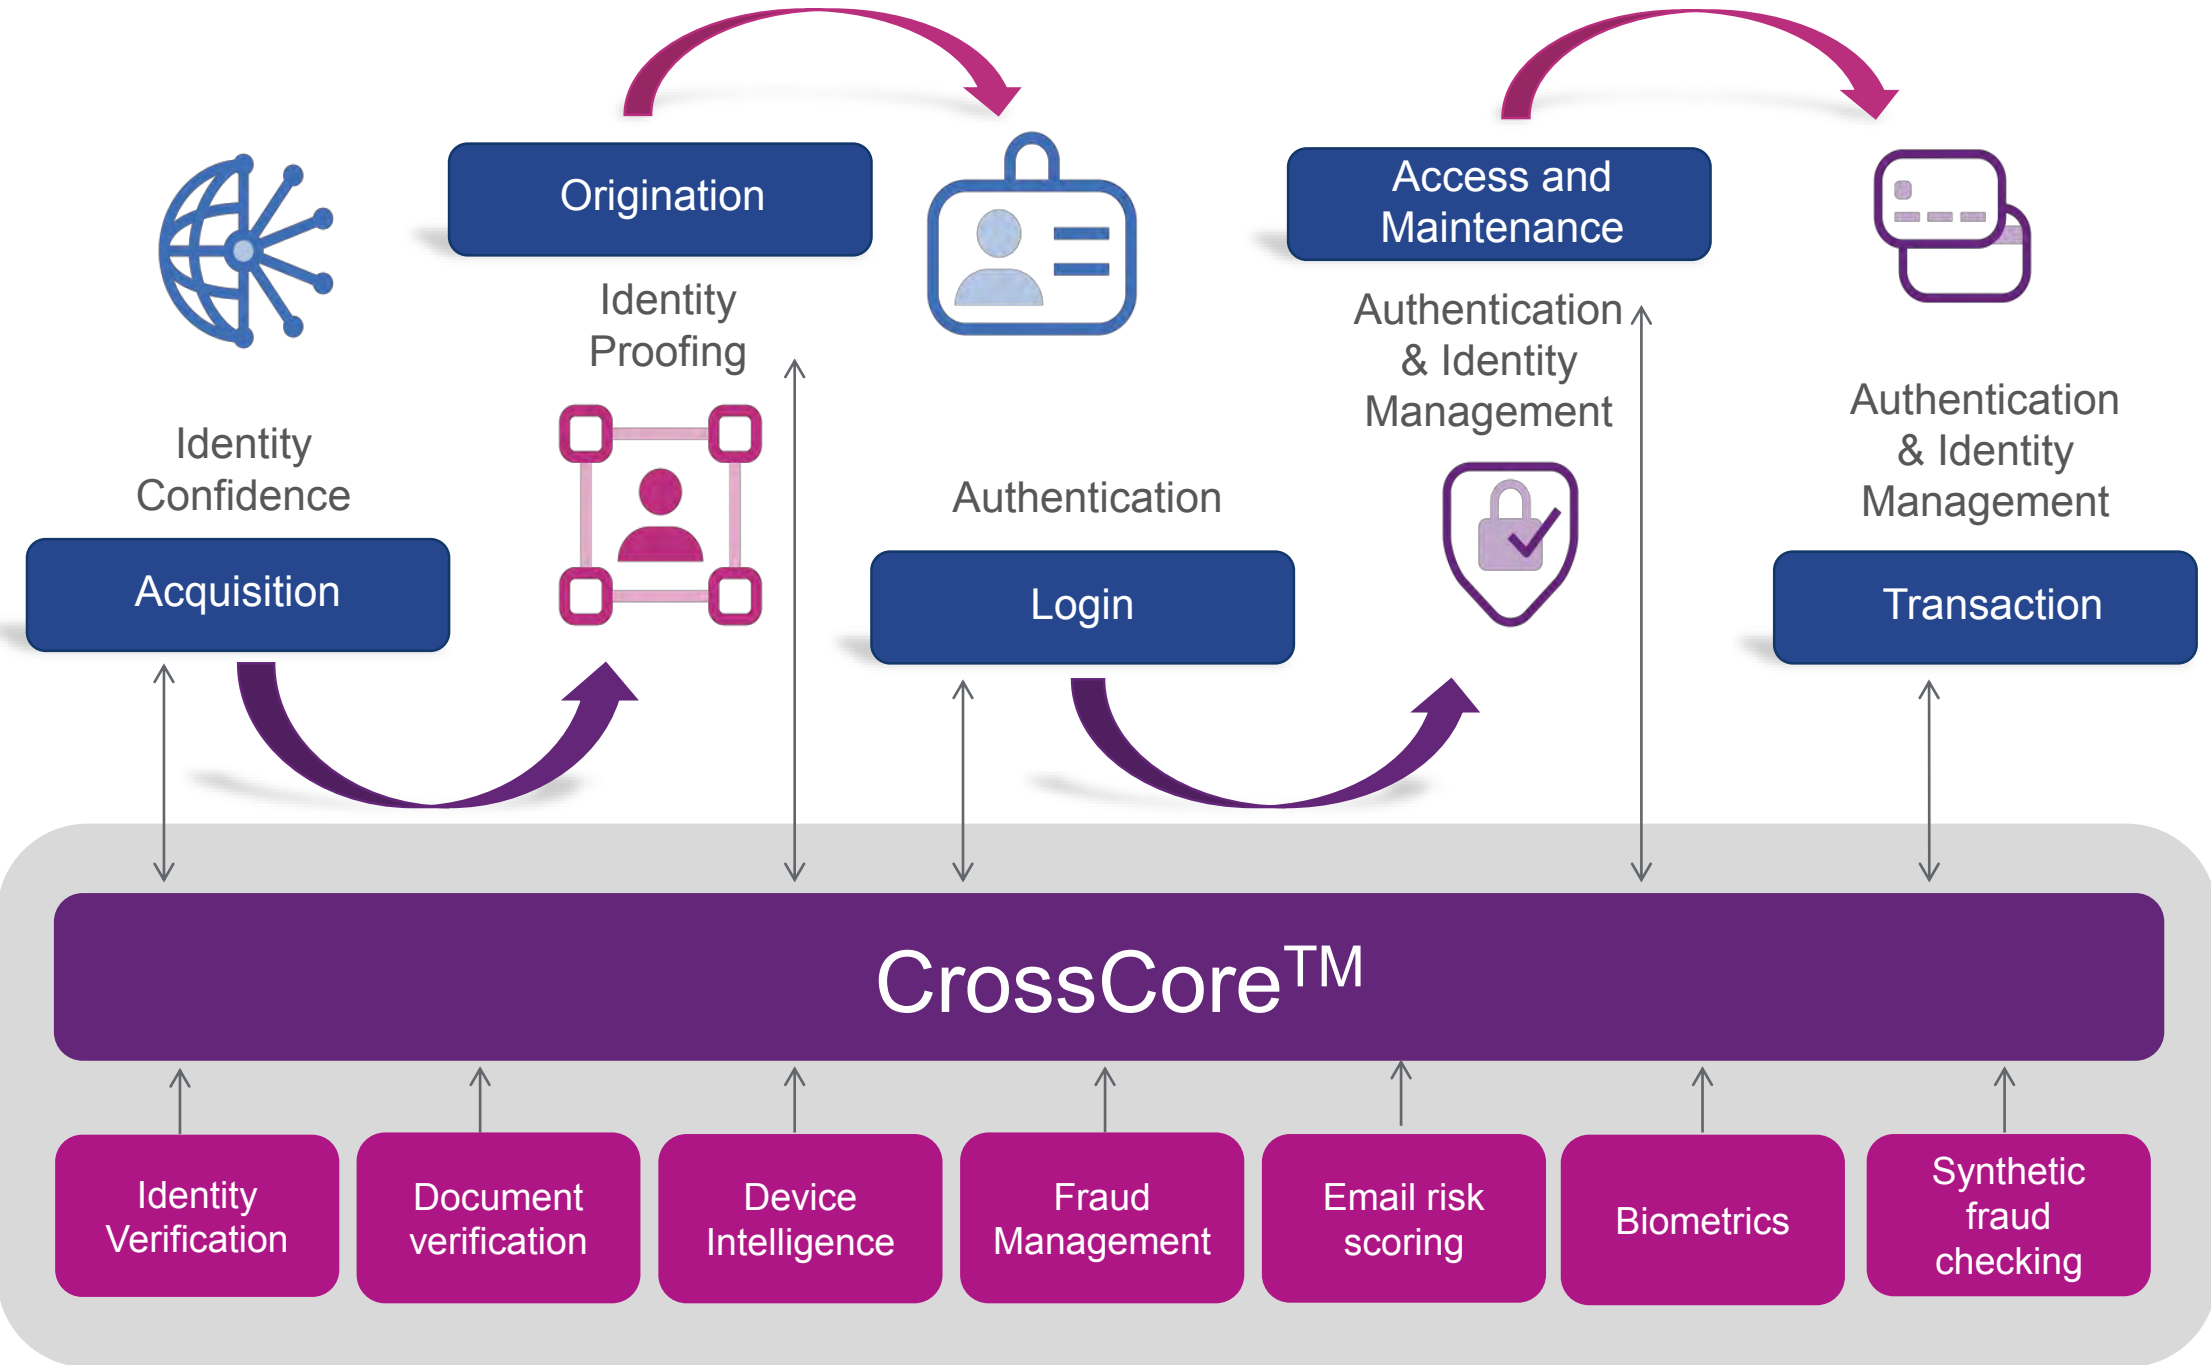

New capabilities

- Faster speed to market
- More from existing systems
- Easier to justify new tools

Better outcomes

- Less friction
- More top-line growth
- Catch fraud faster
- Improve compliance
- More efficiency
- Lower cost

CrossCore and Your Customer Journey

Experian Products and Innovation

Behind the CrossCore Platform

PRECISE ID

FRAUDNET

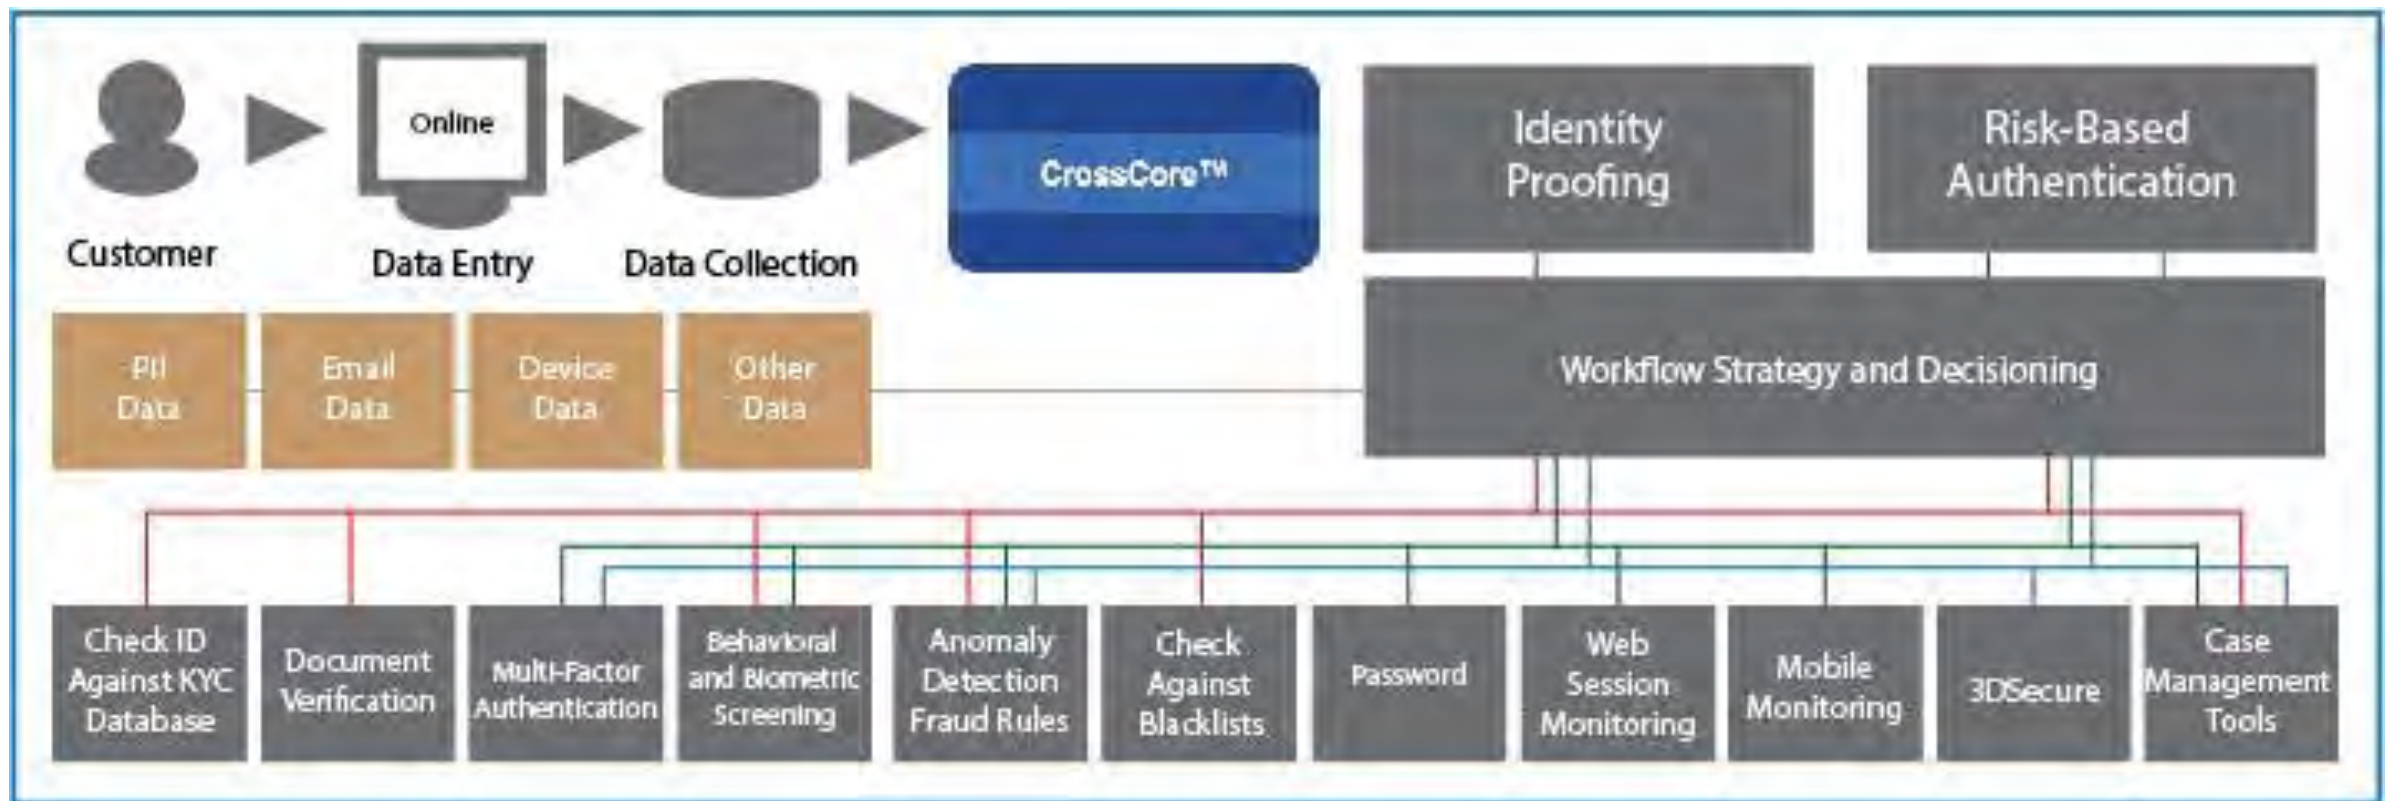

- Customer identity verification
 - High level of identity data assurance via risk based authentication
 - Score options to best assess risk based on portfolio type
 - Consulting and analytics expertise to recommend industry best practices
- + Detect application and new account opening fraud
 - + Detect when one device is attempting to open several accounts
 - + Automated risk assessment and issue resolution
 - + Case management, archiving, searching link analysis and data visualization tools

The Total Solution

A smart hub that scales to each processing activity

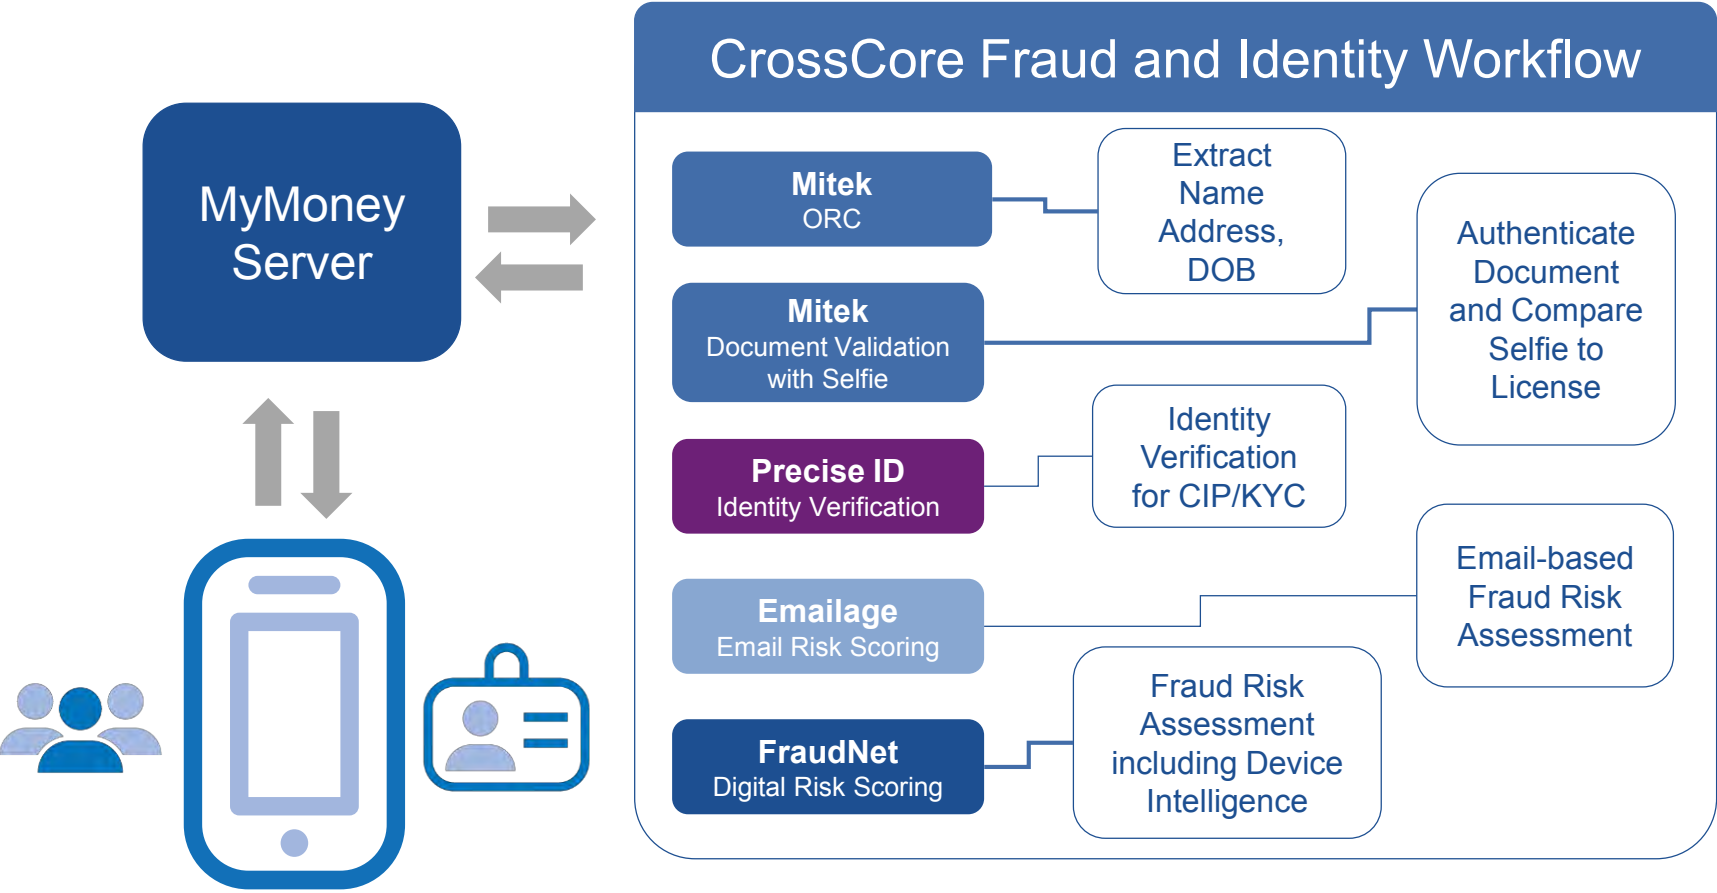

Dynamically activate the best risk-based decisioning process based on logic

Strategic Planning for Growth

October 4, 2018

Strategic Question One

Who will be tomorrow's borrowers?

Who will be tomorrow's borrowers?

By 2044 more than 50% of all Americans are projected to belong to a minority group

50% of consumers have subprime credit AND make less than \$30,000

75% of consumers are living paycheck-to-paycheck

Millennials are carrying more debt and make less

45% of millennials have supplemented banking activities with some form of predatory financial services – within the past year

Who will be tomorrow's borrowers?

Global Financial Literacy Excellence Center surveyed more than 5,500 people between the ages of 23 and 35. Their research unveiled the following statistics on Millennials:

- **54%** worry that they cannot repay their student loans
- **76%** lack basic financial knowledge
- **50%** would have trouble coming up with \$2,000 in one month
- **34%** are unhappy with their current financial situation

Gallup suggests that Millennials are the most vulnerable generation to the threats AI poses, with **37%** of Millennials being at risk of redundancy.

Who will be tomorrow's borrowers?

Key Questions:

How will changing preferences and demographic/economic realities change:

- Who we lend to?
- Features and benefits of loan products?
- What skill sets will employees need to serve them?
- Our brand promise?
- Our service culture?
- How will we differentiate?
- Who will we compete with for these loans?

Strategic Question Two

How will tech effect the way we do business?

How will tech effect the way we do business?

Financial technology expectations run very high among young adults (21-35)

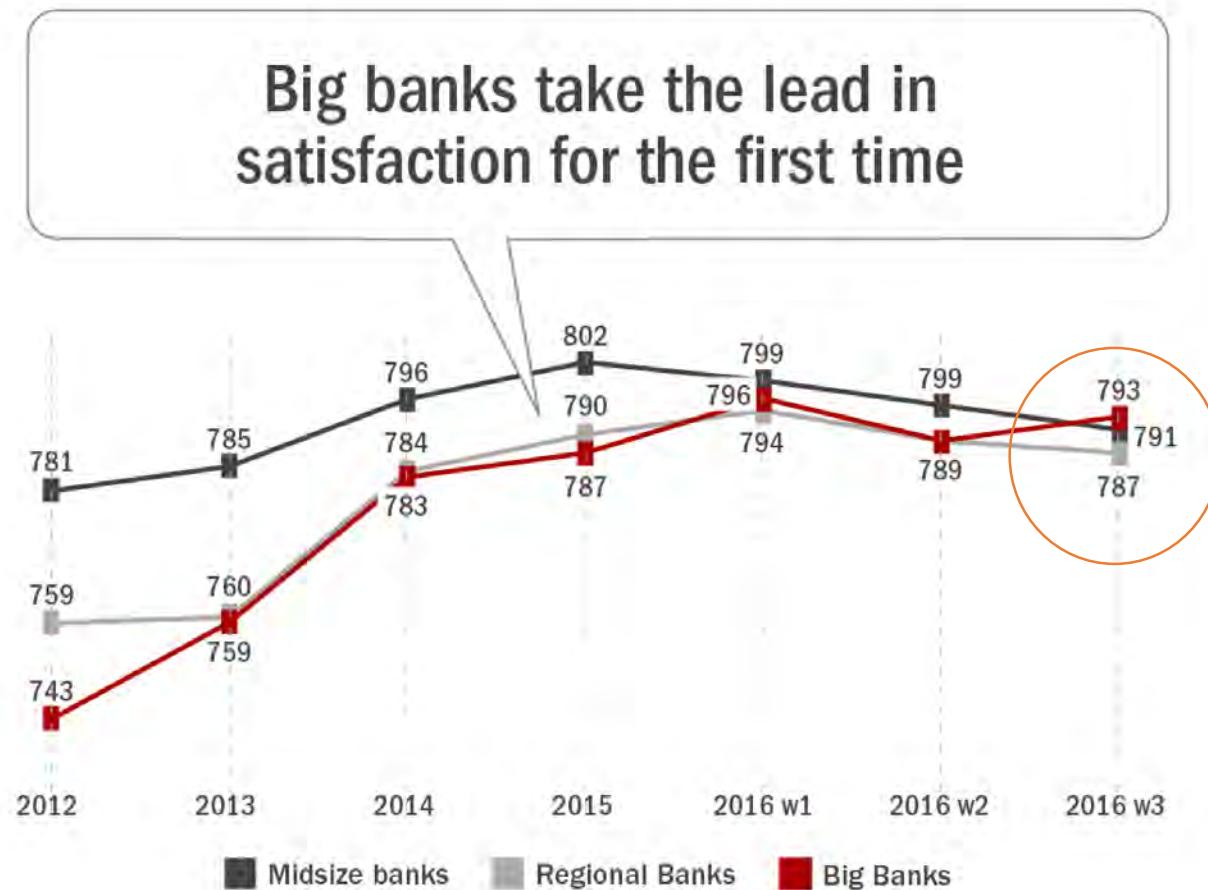

- Real-time loan quotes on mobile
70.7%
- Real-time alert notifications
75.7%
- Real-time financial management tools
73.7%
- Initiate/close a loan digitally
69.6%

The Amazon logo, featuring the word "amazon" in a lowercase, sans-serif font with a curved orange arrow underneath it.

According to a Jan 2017 survey from Accenture, millennial participants would consider parking their money with nontraditional institutions like Amazon and Google.

The Google logo, featuring the word "Google" in its characteristic multi-colored font.

How will tech effect the way we do business?

Source: J.D. Power & Associates © February 2016 The Financial Brand

“The largest banking organizations improved in overall customer satisfaction, while mid-sized banks declined and regional banks plateaued.

This was attributed primarily to improved mobile and online satisfaction.”

How will tech effect the way we do business?

- JP Morgan Chase raised eyebrows when it said it would invest an additional \$1.4 billion in technology in 2018. This is on top of the estimated annual \$9.5 billion tech budget. Last year, the Largest bank spent 16 percent of its budget on technology last year.
- The tech investment will fund what executives called JPMorgan's "digital everything" model, including new mobile features and back-office uses of the blockchain.

Key Questions:

- Can the credit union space "*catch up quickly*"?
- Is your Tech strategy where it needs to be?
- At your current pace of adoption, will you be left behind?

Strategic Question Three

How will we manage fraud risk?

How will we manage fraud risk?

In 2017, 16.7 million U.S. consumers were victims of identity fraud (which includes credit card fraud), resulting in \$16.8 billion in total losses.

[Javelin Strategy](#) says this figure was up 8% from 2016 despite new security protections implemented by the credit card industry such as EMV chips.

Number of Data Breaches in the U.S.
Source: Identity Theft Resource Center (2018)

How will we manage fraud risk?

1
\$

According to the LexisNexis 2017 True Cost of Fraud study, every \$1 of fraud - costs organizations in industries such as financial services and lending sectors an average of \$2.67.

6%

Nearly half of all CUs increased their annual security budget by 6%.

Key Questions:

- Culturally, how does your organization respond to increasing risks?
- Does your organization have the risk management plan needed to respond to increasing future risks?
- Where do you draw the line between member service and security?

Compromised Social Security Number

 Social Security Number: ***-**-****
: 12/04/2017

We've found a match to your Social Security Number (SSN) online. Below you will find additional information on next steps to take to ensure your personal information is secure.

Additional Info

The following data was found compromised with your SSN.

Email	SA*****O2@EXPERIAN.COM	Card Number	*****0003
Social Security Number	***-**-7141	Source	TEST DATA

Here's what to do:

1. Contact Chase Credit Journey at (888) 888-8888. We'll help you determine if an identity theft event has occurred and guide you through any necessary restoration activities. We may assist you with the following activities:

- Contact Social Security administration
- Review your credit report for indications of identity theft
- Place a fraud alert or security freeze with the three credit bureaus

2. As a precaution, keep an eye on your accounts for unfamiliar transactions.

Why monitor your personal information?

If a match to your monitored personal information is found, your risk of identity theft is increased. Being in the know about your compromised personal information can help you mitigate risk by taking proactive steps to protect yourself.

Consumers Achieve Positive Improvements From Credit Education

Action	Educated group	Control group
Average Score	↑ +14 pts	→ +/- 0 pts
Number of credit inquiries	↓ -9%	→ 0%
External collection trades	↓ -21%	↑ +1%
% of trades ever delinquent in last 12 months	↓ -7%	→ 0%

Amount Past Due Is Reduced

Avg Amount Past Due on Trades

Report Pull

- 38% drop in average amount past due

No Report Pull

- 24% rise in average amount past due

Report Pull

- Significantly more past due debt overall
- Makes a significant drop from \$46 per subscriber to \$28 per subscriber

No Report Pull

- Rise in past due amount in the 1 year period

Avg Amount Past Due on Trades
1 Year Change

Delinquent Subscribers Can Be Minimized

Report Pull

- In the 1 year period from Jan-2016 to Jan-2017, both segments saw a rise in the percentage with Delinquent Trades, but the Report Pull group had considerably less growth (9% compared to 23%)

No Report Pull

- 23% rise in delinquent trades
- The overall rise for both segments for the 1 year period would seem to indicate a broader trend of higher delinquencies in the economy in 2016

Report Pull

- Interestingly, a much smaller percentage of the Report Pull segment has delinquent accounts
- This indicates that the Report Pull segment has
 - a) significantly higher borrowing activity
 - b) significantly higher amounts past due when they lapse on payment

Derogatory Trades Are Mitigated

Report Pull

- The Report Pull segment made noticeable improvement in Derogatory Trades over the year at 13% less

No Report Pull

- The No Report Pull segment shows a 1% growth for the year
- The noticeable difference is that the No Report Pull segment is fairly flat in Derogatory Trades for the year

Report Pull

- Derogatory Trades show similar distributions to Delinquent Trades

No Report Pull

- The noticeable difference is that the No Report Pull segment is fairly flat in Derogatory Trades for the year

Subprime Segment Score Improvement

Credit tiers	VantageScore 3.0
Superprime	781-850
Prime	661-780
Near prime	601-660
Subprime	300-600

Report Pull

- Vantage Score improved 28 points
- Segment had a significantly larger improvement at 5%, compared to 3% for No Report Pull group
- **40% greater Vantage Score improvement for the educated segment**

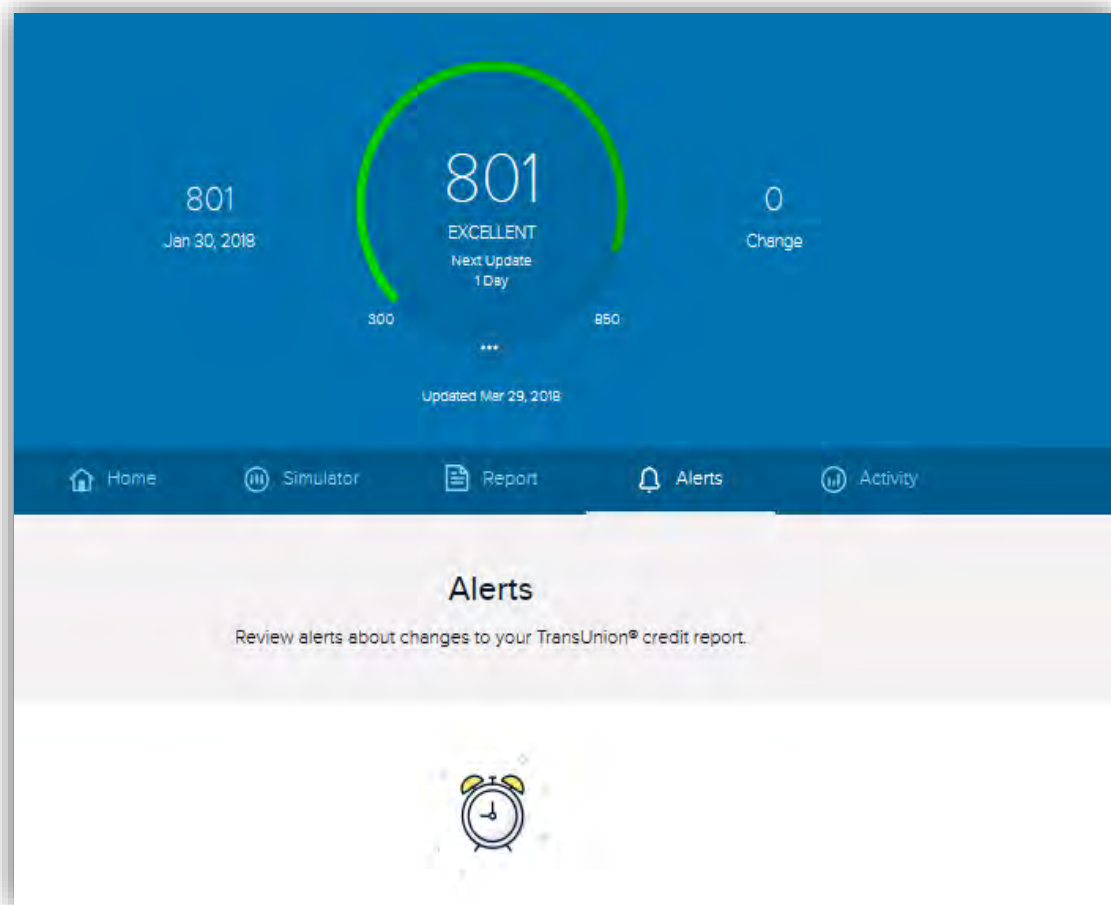

Summary

Credit Education and Credit Health Are Related

- 1 The Report Pull segment had **38% less** in average amount past due compared to a 24% rise for the No Report Pull segment
- 2 Having Report Pulls is associated with **significantly less growth in delinquent accounts**
- 3 Derogatory Trades goes down for the Report Pull segment and had mild growth for the No Report Pull segment
- 4 **45% greater Vantage Score improvement for Subprime consumers** who were educated indicates that engaged and educated consumers in the lowest tiers of credit score are seeing the greatest improvements

Alert Frequency Drives Engagement

Partners that use CLUB notifications and Positive Activity Alerts see an increase of **45%+** in alert frequency per service, translating to a commensurate increase in portal visits and time on site

Expansion Social Media Monitoring

○ Privacy Risks

Alerts customers if the content they are sharing on their social networks – profile information, comments, wall posts and more – may exposure personal data that puts them at risk for identity theft

○ Reputational Risks

Tells customers if content found on their social network profile could be damaging to their reputations. Such content could include foul language, sexual content, and drug and alcohol references

○ Parental Risks

Enables customers to monitor their children's social networks for the same privacy and reputational concerns in addition to instances of cyberbullying, references to weapons or intended sexual abuse

○ Connects to

FAQS

Expand All

- Can I add more than one account for any social network?
- How far back does my initial report search?
- How soon after risky content is posted will I be notified?
- Does this service scan my images in addition to the written content posted on my social networks?

MANAGE YOUR PERSONAL ONLINE REPUTATION

- DO** set and frequently check the privacy settings of your social media profiles, and search for yourself on the internet to get an idea of your current online reputation.
- DO** be smart about what you say on the internet, and what you let others say about you. Take control of your personal brand.
- DO** consider social media monitoring and web suppression service.
- DO NOT** post personal identifiable information (PII) on the internet. This includes birthdate, email, address and phone number. This can put you at increased risk for identity theft and put your employer at increased risk for data theft.
- DO NOT** accept friend requests from strangers or post your location on social media, as this will increase your likelihood of becoming a victim of fraud.
- DO NOT** post proprietary information from your employer or customers - past or present.

Wrap-Up Day 2

Advisory Council 2.0

Advisory Council 2.0

Over the Coming Year, We're Raising Our Game

The Why

- Meeting the needs of Credit Unions is at the forefront for the dedicated Credit Union team
- Staying closely connected with the Council beyond the once-a year-meeting

Your Involvement

- More engagement throughout the year on topics such as:
 - New product development
 - Emerging trends
 - Unmet needs in the marketplace
 - Insight into hot topics facing Credit Unions
 - Feedback on our service

Advisory Council 2.0

Over the Coming Year, We're Taking the Council to the Next Level

What is the time commitment?

- Within a given **calendar quarter**, members will **not** be asked to participate **more than two hours**
 - Most quarters, the participation will be far less

What we will need your partnership?

- Participate in **quarterly 1-hour Webex calls** with your peers to discuss hot topics and/or provide feedback on Experian initiatives (3x's throughout the year)
- **In-depth interview** to learn more about you, your role and how we can serve you better
- Occasional **surveys or 1-on-1 conversations** to gather insights
- Offered an opportunity to **be quoted** in thought leadership (optional)

VISION2019

May 5–8

JW Marriott Hill Country
San Antonio, Texas

RESERVE YOUR SPOT AT VISION

Your decisions affect your organization. You work hard to fuel its growth and enhance ROI.

For more than 36 years, Experian's Vision Conference has connected business leaders like you to ideas and solutions that help them meet future challenges. This is an exciting time for our industry, and change is required to remain agile and meet your customers' growing expectations.

Vision offers:

- Unique networking opportunities with your peers.
- One-on-one conversations with subject matter experts.
- A content-rich agenda that provides useful insights from the industry's thought leaders.
- Face-to-face with Experian executives and product leaders – exchanging ideas, discussing best practices and hearing about the latest industry technology and innovations.
- Intriguing keynotes. Past speakers include Tom Brady, Steve Wozniak, President Bill Clinton, Leon Panetta, Magic Johnson and Madeleine Albright.

Our attendees come from a wide range of industries, and the content is relevant to members from all levels of your organization:

- C-level executives.
- Business line management.
- Functional roles, including:
 - Credit and collections management.
 - Business development.
 - Consumer and commercial lending.
 - Analytics.
 - Modeling.
 - Fraud management.

For more information on industries we focus on or to reserve your spot now, go to www.experian.com/vision.

Early-bird registration ends January 15.
