

New Release – Mapping Lookup Feature for Radius and Multi-Radius

We are pleased to introduce a new lookup feature for the Single and Multi-Radius geography options in [Data Select](#).

Along with Zip Code™, ZIP+4™, Zip Carrier Route and Latitude/Longitude, we now offer the ability to lookup and modify your radius selection on a map.

The new lookup is a convenient visualization tool for selecting radial locations. This new feature allows you to:

- Actually see the radial location and visually confirm your selection
- Adjust your selection on-the-fly by clicking and dragging markers on a map
- Specify the centroid of a radius count with the highest accuracy
- Use the versatile navigation options of Google Maps technology
- Switch between regular street map, satellite image and street map with terrain

Start using this new feature today!

To start using Mapping Lookup:

1. Select “**Point on a Map**”
2. Then click on the “**Open a Map**” button

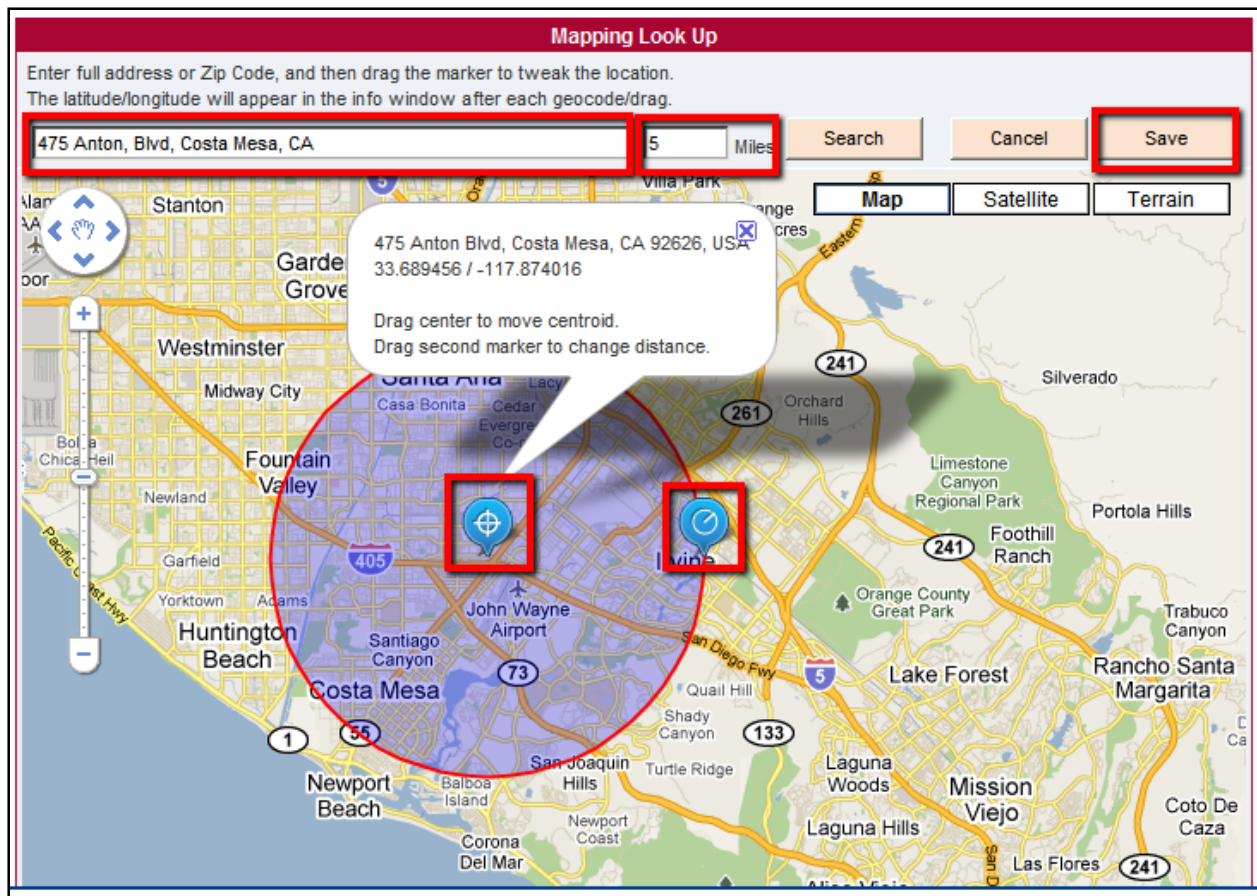

Geographical Radius Selections

Selecting geography based on a radius allows you to target the closest records around a center point. You can use the look-up option to retrieve the ZIP, ZIP+Carrier Route, ZIP+4 or Lat/Long for any USPS valid address.

A radius can be the only geographical selection on a single count.

Step 1	Choose miles or quantity
	<input checked="" type="radio"/> Miles <input type="radio"/> Quantity
Step 2	Choose centroid to use
	<input type="radio"/> ZIP <input type="radio"/> ZIP + Carrier Route <input type="radio"/> ZIP + 4 <input checked="" type="radio"/> NEW! Point on a Map (Recommended) what is it?
Step 3	Enter the data
	Latitude <input type="text"/> Longitude <input type="text"/> <input type="button" value="Open a Map"/> Miles/Qty <input type="text"/>
Option:	<input type="checkbox"/> Do not cross state lines

3. Define your centroid, you can enter an address or just a ZIP Code™
4. Enter radial distance in miles and then click “**Search**”
5. Drag the blue markers to move your centroid and adjust your radial distance
6. Click “**Save**” to save your selections

Coming Soon

The release of the Mapping Lookup feature is just the first step - we are working on a brand new full scale mapping feature that will provide a multitude of new options that we expect to release in early 2011. Keep your eye out for notifications!
